Learners Without Borders Yong Zhao,2021-06-30 The future of education centers empowered students in a global learning ecosystem Despite decades of reform the traditional borders of education graduation curriculum classrooms schools have failed to deliver on the goals of excellence and equity Despite massive societal changes education remains controlled by an old mindset It is time to change that limiting mindset and more importantly the ineffective practices in education To truly serve all learners future classrooms must remove the boundaries of learning and become student centered culturally responsive and personalized supportive and equitable environments where each student can direct their own learning and seek multiple pathways to skills and knowledge in a global learning ecosystem This compelling call for transformative change offers all involved in education Evidence based arguments that reveal the need to break the traditional borders that limit learning Strategies to personalize learning and remove the confinement of traditional pathways Examples from around the world to create equitable and student centric learning environments Resources for creating a school learning environment that expands opportunities for personalized learning into the global learning ecosystem It is time to now imagine a different kind of learning without borders and to begin the shifts in practice that will result in personalized learning for all students

Demystifying China's Innovation Machine Marina Yue Zhang,Mark Dodgson,David Gann,2022 China s extraordinary economic development is explained in large part by the way it innovates Contrary to widely held views China s innovation machine is not created and controlled by an all powerful government Instead it is a complex interdependent system composed of various elements involving bottom up innovation driven by innovators and entrepreneurs and highly pragmatic and adaptive top down policy Using case studies of leading firms and industries along with statistics and policy analysis this book argues that China s innovation machine is similar to a

natural ecosystem Innovations in technology organization and business models resemble genetic mutations which are initially random self serving and isolated but the best fitting are selected by the market and their impacts are amplified by the innovation machine This machine draws on China s multitude manufacturers supply chains innovation clusters and digitally literate population connected through super sized digital platforms China s innovation suffers from a lack of basic research and reliance upon certain critical technologies from overseas yet its scale size and scope diversity possess attributes that make it self correcting and stronger in the face of challenges China s innovation machine is most effective in a policy environment where the market prevails policy intervention plays a significant role when market mechanisms are premature or fail The future success of China s innovation will depend on continuing policy pragmatism mass innovation and entrepreneurship and the development of the new infrastructures Globalisation and Pandemic Management Chris L.
