Making Media Futures Phillip H. Roth, Ana María Guzmán Olmos, Alin Olteanu, Stefan Bösch, 2025-04-22 *Making Media Futures* offers a multi perspectival exploration of how imaginaries and knowledge of the future are constructed in and through various media The volume addresses the discursive dimensions of imaginaries and future visions as well as the impact of technological material and cultural conditions on the propagation of future discourses through media Providing both theoretically detailed and empirically rich investigations the contributions offer a wide range of cases spanning the century from the end of World War II until today and looking at examples from the Southern Hemisphere as well as the Global North Bringing together scholars in media studies science and technology studies STS and the history and philosophy of technology the chapters discuss future visions and imaginations of quantum computing the uncertainty and impact of AI based text to image generation the ideology behind 5G telecommunication standards imaginaries of the Internet of Things transmedia strategies in global and local climate protests how broadcast radio was implicated in the evangelical mission imaginary and how early visions of automating scholarly information management shaped standards and ideals of academia The volume thus complements existing approaches and analytical frameworks for the study of imaginaries and futures discourses with perspectives that are sensitive to the plurality of media specific conditions and technologies The book will interest students and scholars working

in media studies STS history and philosophy as well as at the intersection of engineering humanities and social sciences on matters such as sustainability ethics and responsible innovation

Path to Singularity J. Craig Wheeler, 2024-11-19 In a rapidly changing world are we on the brink of creating technology that outpaces our ability to control it Astrophysicist J Craig Wheeler former president of the American Astronomical Society takes a critical look at the technological advances shaping our future From artificial intelligence to genetic engineering Wheeler explores how these innovations are interconnected and the potential they hold for humanity's evolution He warns of a future where autonomous machines outsmart us and genetic modifications challenge our very essence With thought provoking insights into the ethical dilemmas we face Wheeler stresses the importance of staying informed and proactive

Key Questions Raised by Wheeler Will there be jobs for those willing to work in a future dominated by automation How might social media companies manipulate our decisions potentially stripping us of free will Could AI influence or even dictate our voting behaviors If widespread mental connectivity becomes a reality could we see the emergence of a collective consciousness that erases individuality Have we exhausted Earth's resources and is population control necessary What implications arise if we solve aging How will society adapt to the challenges of perpetual youth What are the realistic prospects of migrating to space as Earth becomes increasingly inhospitable Our decisions today will determine if we control technology or if it controls us Through an engaging narrative Wheeler not only outlines the challenges but also offers practical advice on how we can retain control over our technological destiny Includes a Foreword by Neil DeGrasse Tyson

Surviving the Wild Wild Web Marton Gergely, Ian Grey, Heba Saleous, 2024-12-26 The information security arena is often vague and confusing for internet users both young and old New traps are being devised daily and falling into them can take legal ethical financial physical and mental tolls on individuals With increasing cases of fake news identity theft piracy spying and scams surfacing this book explains the risks of the internet and how they can be mitigated from a personal and professional perspective
