platform's most distinctive cultural forms and genres have strong ideas and interests of their own. While preserving the original edition's forensic analysis of YouTube's early popular culture and uses this fully revised and updated edition weaves fresh examples, updated theoretical perspectives and comparative historical insights throughout each of its six chapters. Burgess and Green show how over its more than a decade of existence, YouTube's dual logics of commerciality and community have persisted, generating new genres of popular culture, new professional identities and business models for the media industries and giving rise to ongoing platform governance challenges. The book is essential reading for anyone interested in the contemporary and future implications of digital media platforms and will be particularly valuable for students and scholars in media communication and cultural studies.

The Science of Digital Marketing Gaurav Kanchan Gupta, 2024-06-27. The Science of Digital Marketing explains the What, How, Why, Where. 2. Social Media Marketing: Facebook Ads, 3. Search Engine Optimization (SEO), and 4. Marketing Automation. Each of these sections gives a detailed account of important aspects of these channels. The book provides an in-depth analysis of different factors and parameters that come together to run a successful Digital Marketing campaign. Algorithmic Gatekeeping for Professional Communicators Arjen van Dalen, 2023-05-30. This book provides a critical study of the power, trust and legitimacy of algorithmic gatekeepers. The news and public information which citizens see and hear is no longer solely determined by journalists but increasingly by algorithms. Van Dalen demonstrates the gatekeeping power of social media algorithms by showing how they affect exposure to diverse information and misinformation and shape the behaviour of professional communicators. Trust and legitimacy are foregrounded as two crucial antecedents for the acceptance of this algorithmic power. This study reveals low trust among the general population in algorithms performing journalistic tasks and a perceived lack of legitimacy of algorithmic power among professional communicators. Drawing on case studies from YouTube and Instagram, this book challenges technological deterministic discourse around filter bubbles and echo chambers and shows how algorithmic power is situated in the interplay between platforms, audiences and professional communicators. Ultimately, trustworthy algorithms used by news organizations and social media platforms as well as algorithm literacy training are proposed as ways forward towards democratic algorithmic gatekeeping. Presenting a nuanced perspective which challenges the deep divide between techno-optimistic and techno-pessimistic discourse around algorithms, *Algorithmic Gatekeeping* is recommended reading for journalism and communication researchers in related fields.
