Aliev,Janusz Kacprzyk,Witold Pedrycz,2025-01-04 This book compiles state of the art studies and real world applications in ecosystems and smart environments It covers important subjects like creating a sustainable economy green and renewable energy and IoT powered industrial and agricultural systems Along with providing insights into theory modelling and the deployment of smart cities and infrastructure the book also examines the use of AI in the earth and environmental sciences and economy The book is intended to be a priceless tool for scholars professionals and recent graduates It acts as a manual and source of inspiration for promoting environmentally friendly technologies and sustainable solutions It opens the door for creating intelligent systems that maximise resource use reduce carbon footprints and enhance

general quality of life by incorporating the most recent technological developments      Conversational Artificial Intelligence  
Romil Rawat,Rajesh Kumar Chakrawarti, Sanjaya Kumar Sarangi, Anand Rajavat, Mary Sowjanya Alamanda, Kotagiri  
Srividya, K. Sakthidasan Sankaran, 2024-01-30 This book reviews present state of the art research related to the security of  
cloud computing including developments in conversational AI applications It is particularly suited for those that bridge the  
academic world and industry allowing readers to understand the security concerns in advanced security solutions for  
conversational AI in the cloud platform domain by reviewing present and evolving security solutions their limitations and  
future research directions Conversational AI combines natural language processing NLP with traditional software like  
chatbots voice assistants or an interactive voice recognition system to help customers through either a spoken or typed  
interface Conversational chatbots that respond to questions promptly and accurately to help customers are a fascinating  
development since they make the customer service industry somewhat self sufficient A well automated chatbot can decimate  
staffing needs but creating one is a time consuming process Voice recognition technologies are becoming more critical as AI  
assistants like Alexa become more popular Chatbots in the corporate world have advanced technical connections with clients  
thanks to improvements in artificial intelligence However these chatbots increased access to sensitive information has raised  
serious security concerns Threats are one time events such as malware and DDOS Distributed Denial of Service assaults  
Targeted strikes on companies are familiar and frequently lock workers out User privacy violations are becoming more  
common emphasizing the dangers of employing chatbots Vulnerabilities are systemic problems that enable thieves to break  
in Vulnerabilities allow threats to enter the system hence they are inextricably linked Malicious chatbots are widely used to  
spam and advertise in chat rooms by imitating human behavior and discussions or to trick individuals into disclosing personal  
information like bank account details      *Mastering Salesforce Flow for Enterprises* James A Hutcherson, 2025-01-30
