Education Strategy in a Changing Society Martin Slattery, 2024-03-04. Placing the UK in a global context, this book engages with the emerging international debate on the future of education in the 21st century. It examines the post-pandemic paradigm shift in educational practice in countries around the world and presents international case studies of emerging future practice. However, while it embraces the global context and the mega-forces therein, it is specifically focused on the challenges for education in England today and the potential strategies for moving forward to the all-inclusive, personalised, smarter, and lifelong learning needed for tomorrow. In doing so, it explores how the new curriculum models, new approaches to pedagogy, and new educational technology such as AI and even robotics might help to transform education in England, help level up learning, and help younger generations cope not only with the future as we know it but also the future that we don't. This book will appeal to policymakers, students, and scholars interested in the sociology of education, education policy, international education, international development, and future studies, as well as those with a general interest in Education in the future.
