Quick Creator Economy Trends For Beginners For Teens:

Critical Internet Literacies Jamie Cohen, 2024-12-30 An introductory critical internet studies text that builds upon media literacy and digital culture theory to offer a thorough examination of the intersection of online technology and culture We are now collectively at a hinge point in the evolution of the web where online influencers can sway national discourse geopolitical events are remixed through memes and online harms are misunderstood This book argues that people are generally aware that online media has repercussions in off platform spaces but sometimes lack the language to properly critique online trends memes and internet born media How are citizens activists and marginalized groups able to use these tools effectively and safely in these times Jamie Cohen explores aspects of internet culture in an approachable manner building upon critical media literacy and applying a critical technocultural analysis as a methodology to reimagine how media literacy can operate in an online media environment The book explores key topics such as accessibility the creator economy content moderation tech bias platform capitalism internet culture and safety Offering a new way of reading internet media and critiquing content and creators this book is essential reading for students and scholars of digital culture internet culture media literacy social media and beyond

From Pessimism to Promise Payal Arora, 2024-09-03 A radical paradigm shift in the way we think about AI and tech taking hope and inspiration from the aspirational users of new technologies around the world When it comes to tech the mainstream headlines are bleak Algorithms control and oppress AI will destroy democracy and our social fabric and possibly even drive us to extinction While legitimate concerns drive these fears we need to equally account for the fact that tech affords young people something incredibly valuable a rare space for self actualization In *From Pessimism to Promise* award winning author Payal Arora explains that outside the West where most of the world's youth reside there is a significant different outlook on tech in fact there is a contagion of optimism toward all things digital These users especially those in marginalized contexts are full of hope for new tech As AI disrupts sectors across industries education and beyond who better to shine the light forward Arora argues than the Global South the navigator of all manner of forced disruptions leapfrogging obstructive systems norms and practices to rapidly reinvent itself Drawing on field insights in diverse global contexts such as Brazil India and Bangladesh Payal describes what drives Gen Z to embrace new technologies *From Pessimism to Promise* discusses the shift to relationally driven approaches to design how to create algorithms of aspiration how to reimagine the digital space for sex pleasure and care and what we can learn from feminist digital activists and women's collectives in the Global South on shared digital provenance and value as well as indigenous approaches to sustainability that challenges sacred ideas on degrowth circular economy and the doughnut economy Arora also takes heart in the power in numbers as the users from the majority world infuse algorithms with everyday aspirations pushing for a new digital order Timely and urgent *From Pessimism to Promise* makes a deeply compelling case that it is not naive to be optimistic about our digital future On the contrary it is our moral imperative to design with hope

The Art of Status Jelena Subotic, Professor of

Political Science Jelena Subotic, 2025-10-09 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally right As a result of this reframing of what it means to own art an artifact's historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In *The Art of Status* Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Subotic tells the story of these artworks how they were looted how they ended up on display in national museums and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige An in depth and nuanced account of art restitution disputes *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution

The Sustainable Fashion Quest Nikolay

Anguelov, 2021-06-27 When thinking about lowering or changing consumption to lower carbon footprints the obvious offenders come easily to mind petroleum and petroleum products paper and plastic even food but not clothes When people evaluate ways to lower their personal carbon footprint by changing purchasing habits they are bombarded with information to avoid petroleum and petroleum products plastics paper even food but not clothes Most consumers do not think of clothes as a source of environmental damage Yet clothes are made with petroleum products through chemically laden industrial processes that generate significant pollution The fashion industry is among the largest organic water polluters in the world accounting for significant greenhouse gas emissions and generating massive amounts of waste as a function of the frequent discarding of used clothing In *The Dirty Side of the Garment Industry Fast Fashion and Its Negative Impact on Environment and Society* author Nikolay Anguelov exposed the ecological damage from the fast fashion business model In this book The

Sustainable Fashion Quest Innovations in Business and Policy the author takes this one step further by focusing on solutions This book uses the familiar yet complex industry of fashion as a lens to examine how business pressures and national and international policies can have both positive and negative social and ecological impacts It provides an analysis of extant and emerging policies to address the divergence in the ongoing quest to maximize economic development and minimize the social costs of the industrialization process It also examines emerging technologies and innovative business models that have the potential to revolutionize how fashion is perceived manufactured and consumed This book begins with an introductory letter that outlines the social and environmental issues facing the fashion industry as well as emphasizing the seriousness and urgency of addressing them Each chapter then focuses on a major aspect of the industry with an increasing emphasis on policy The chapters outline the impact of global level and business level decisions on the industry s success its social and environmental impact and its relationship to consumers The goal of the book is to define that transition explain its challenges and educate readers on the possibilities to become powerful drivers of change through their professional actions and their personal behavior as consumers While the book specifically analyzes the fashion industry it also explains the implications for other industrial sectors It uses a product everyone is familiar with we all buy clothes after all to examine the decisions impacts and policies shaping the industry behind the scenes The linkages are applicable to other fast moving consumer goods FMCG business sectors such as consumer electronics which are starting to face sustainability criticism for relying on a business model of promoting a high frequency of repeat purchasing
