Multimodal Interactive Handwritten Text Transcription Verónica Romero,Alejandro Héctor Toselli,Enrique Vidal,2012 This book presents an interactive multimodal approach for efficient transcription of handwritten text images This approach rather than full automation assists the expert in the recognition and transcription process Until now handwritten text recognition HTR systems are far from being perfect and heavy human intervention is often required to check and correct the results of such systems The interactive scenario studied in this book combines the efficiency of automatic handwriting recognition systems with the accuracy of the experts leading to a cost effective perfect transcription of the handwritten text images The interactive system here allows the user to repeatedly interact with the system Hence the quality and ergonomomy of the interactive process is crucial for the success of the system Moreover more ergonomic
