

The screenshot shows a Slack workspace interface. At the top, the channel name "Product Managers & UX" is displayed, along with the time "Thu, May 26 10:28 PM". The main content area shows a conversation thread with three messages:

- Alice** (10:28 PM): "We are going to need video to truly close the gap. It could be on a higher subscription tier and only available for desktop app."
- Robert** (10:29 PM): "Hey, I am writing a spec for the feature."
- Ryan** (10:30 PM): "User reported having issues with the search field on their system."

On the right side, there is a sidebar with a search bar and a list of users. A purple audio player overlay is visible on the right side of the screen.

the suite of natural radioisotopes which have been present in the oceans since their formation and quantitatively dominate the inventory of radioactivity in the oceans Also addressed are the suite of artificial radionuclides introduced to the oceans as a consequence of the use of the atom for development of nuclear energy nuclear weapons and various applications of nuclear science The major source of these continues to derive from the global fallout of atmospheric tests of nuclear weapons in the 1950s and 1960s but also includes both planned and accidental releases of radioactivity from both civilian and military nuclear technology The other division of the major study direction depends on whether the objective is to use the radionuclides as powerful tools to study oceanic processes to describe and understand the ocean distribution of the various natural or artificial radionuclides or to assess the different radionuclides impact on and pathways to man or marine organisms The oceans cover 70% of the Earth s surface and thus contains a corresponding large share of the Earth s radioactivity Marine Radioactivity covers topics of recent scientific study in this young field It examines both natural radioactivity radioactivity naturally present in oceans since their formation and artificial radioactivity radioactivity introduced by man and use of atomic and nuclear energy with regard to possible effects on the global environment
