Soni, Nitasha Hasteer, Aditi Bhardwaj, Rahul Sindhwani, J. Paulo Davim, 2025-09-30

AI Based Solutions for Inclusive Quality Education helps readers discover practical AI tools for diverse learning styles and abilities fostering inclusivity in education and maximizing the individual potential of students and educators. It provides cutting edge solutions designed to remove barriers due to accessibility and create an equitable classroom. Through practical applications and case studies the book explores the power of AI in creating personalized learning pathways and methods of engagement in the classroom while emphasizing that the human touch with empathy and critical thinking remains central to the learning process. It addresses concerns about the ethical development and deployment of AI in education. Features: Discusses a topic that is at the forefront of concerns in the education sector with the disruptive impact of advances in AI. Provides explanations for specific AI platforms and tools along with their features and applications in education. Includes case studies and discusses inclusivity and the lessons learned from each AI application. Explains how to ethically handle bias, privacy and transparency in AI based solutions in education. Serves as a comprehensive guide for educators, policymakers and technology developers interested in the power of AI in educational environments. This book serves as a timely reference in the current era of AI tools and education. It is written for those who work in the education sector as well as researchers, academicians, undergraduate and graduate students, those involved with undergraduate teaching in critical thinking and problem solving for information systems, information technology, computer science and engineering and all teaching institutions where AI tools have been or will be introduced.

Generative AI and Education B. Mairéad Pratschke, 2024-08-27. This volume addresses the gap in knowledge around generative AI and its applications in education. It draws on the recent history of technological innovation and digital pedagogies, locating generative AI in the contemporary discourse around education futures. It argues that a new hybrid model of education is emerging, requiring educational institutions to embed generative AI into course and programme design, delivery and assessment. It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like. Grounded in educational theory, it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education. It offers advice based on evidence based digital pedagogy, including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice. The book also explores the wider context informing this shift, connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning, learning agility and future skills that make the case for the integration of competency based assessment into mainstream education. Finally, going beyond pedagogy and practice, it considers some of the broader
