Academic Integrity in the Age of Artificial Intelligence Mahmud, Saadia, 2024-02-13. Powerful generative Artificial Intelligence (AI) has defined and transformed our modern era, and the fundamental conceptualization of academia stands at a crossroads. *Academic Integrity in the Age of Artificial Intelligence* delves deep into the seismic shifts and intricate challenges brought forth by the proliferation of AI technologies, exploring the intricacies between innovation and integrity. The rise of generative AI, exemplified by ChatGPT, has set a cascade of change across diverse sectors, including higher education, medicine, and the arts. This book dissects the multifaceted impact of AI on the academic landscape. With AI's ability to craft text and imagery mirroring human creativity, the lines between authentic scholarship and synthetic deception blur. The book examines the delicate balance between productivity and ethics while weaving a comprehensive tapestry of insights from various stakeholders. From academics grappling with the definition of AI-assisted breaches of academic integrity to policymakers reshaping the future of higher education, this book engages a myriad of voices. It scrutinizes the nascent challenges in assessment design, the urgent need to update antiquated integrity policies, and the importance of research ethics in an AI-driven world. This book is ideal for educators, policymakers, students, and technologists through the complicated terrain of AI ethics.

Theory and Practice in Vocabulary Research in Digital Environments Mark Feng Teng, Agnes Kukulska-Hulme, Junjie Gavin Wu, 2024-12-27. This collection is a comprehensive resource on the state of second language vocabulary learning today, building on earlier studies to spotlight the diversity of issues and foci in the field toward encouraging further advancements in both research and practice. The volume foregrounds the importance of vocabulary learning in language teaching and learning and in effective written and verbal communication, charting the range of approaches and theories used to address the unique challenges of vocabulary instruction. While there exists a well-established body of vocabulary research, this book takes those lines of inquiry in new directions by exploring how technology has shifted the focus from teacher-led delivery to more activity-driven experiences. Chapters from prominent researchers and rising scholars feature studies on emergent approaches in virtual environments, such as interactive whiteboards, CMC, virtual world learning, and mobile-assisted language learning. In offering a holistic portrait of technology-enhanced vocabulary learning, the volume makes the case for the power of technological tools in fostering optimal
