Ai Tools For Teachers Guide For Freelance Writers:

Instructional Leadership Efforts and Evidence-Based Practices to Improve Writing Instruction VanSlander, Jennifer, 2023-10-11 Writing is a critical skill for academic and professional success yet it is often neglected in schools. According to achievement data, only a quarter of students in the United States are proficient writers, indicating a significant need for improvement in writing instruction. One contributing factor to this problem is the lack of school and district leadership in writing instruction. School improvement efforts are often concentrated on reading and math, leaving writing instruction overlooked. Additionally, issues related to writer identities, self-efficacy in writing, and educator training can also impact the effectiveness of instructional leadership in this critical subject. *Instructional Leadership Efforts and Evidence-Based Practices to Improve Writing Instruction*, edited by Jennifer VanSlander of Columbus State University, provides within this peer-reviewed book an exploration of evidence-based practices aimed at developing instructional leaders and enhancing student achievement in writing. It covers a broad range of topics related to writing instruction, including learning theories, conceptual models, and the latest empirical research associated with the supervision, organization, implementation, and monitoring of writing programs and instructional approaches. With its emphasis on writer identities, self-efficacy, equitable and inclusive practices, curriculum planning and implementation, assessment, instructional frameworks, and managing instructional change, this book provides educators with a comprehensive guide to improving writing instruction. It is an essential resource for educators who seek to increase the effectiveness of instructional leadership and writing instruction at the classroom, school, or district level.

Integrating Plain English into Writing Activities in the PhD Language Programme Monika Śleszyńska, 2025-09-04 This book explores the intersection of writing theory, language simplification, and academic communication, with a specific focus on integrating plain English into doctoral education. Through five comprehensive chapters, the book discusses essential topics such as the principles of effective writing, the role of clarity and readability in academic texts, and the significance of plain English for enhancing scientific writing skills. Chapter 1 offers an overview of writing theory, emphasizing key concepts that impact the clarity and readability of written texts. Chapter 2 examines the importance of language simplification, particularly in scientific publishing, while Chapter 3 highlights writing challenges in target language classrooms with a focus on writing development. In Chapter 4, the book provides the context for a groundbreaking empirical study justifying the use of plain English in PhD language programmes. Chapter 5 presents detailed data analysis, key findings, and implications for future research, demonstrating how the teaching of plain English enhances doctoral students' writing skills, empowers them as publishable authors, and improves the overall quality of their scientific work. Given the limited research on this topic in Polish educational settings, this book is of interest to scholars and English language teachers in doctoral programmes.
