Digital Storytelling Carolyn Handler Miller,2025-05-22 Digital Storytelling A Creator s Guide to Interactive Entertainment Volume I fifth edition delves into the fascinating and groundbreaking stories enabled by interactive digital media examining both fictional and non fiction narratives This fifth edition explores monumental developments particularly the emergence of generative AI and highlights exciting projects utilizing this technology Additionally it covers social media interactive documentaries immersive environments and innovative uses of video games chatbots and virtual reality Carolyn Handler Miller provides insights into storytelling essentials like character development plot structure dialogue and emotion while examining how digital media and interactivity influence these elements This book also dives into advanced topics such as narratives using AR VR and XR alongside new forms of immersive media including large screens escape rooms and theme park experiences With numerous case studies this edition illustrates the creative possibilities of digital storytelling and its applications beyond entertainment such as education training information and promotion Interviews with industry leaders further enhance the understanding of this evolving universe making it a valuable resource for both professionals and enthusiasts Key Features This book includes up to the minute developments in digital storytelling It offers case studies of noteworthy examples of digital storytelling It includes a glossary clearly defining new or difficult terms Each chapter opens with several thought provoking questions about the chapter s topic Each chapter concludes with several creative and engaging exercises to promote the reader s understanding of the chapter s topic   Invocational Media Chris Chesher,2023-10-19 Invocational Media critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media   **The Advocate** ,2004-08-17 The Advocate is a lesbian gay bisexual transgender LGBT monthly
