

IBM watsonx Code Assistant for Z

Welcome to the watsonx Code Assistant for Z interactive demo.

IBM watsonx™ Code Assistant for Z is a generative AI-assisted product built to accelerate mainframe application modernization at lower cost and with less risk than today's alternatives.

The tracks below follow developers who work together to modernize a large COBOL application that is integral to their business. They generate and insert a detailed explanation as a comment into existing COBOL, refactor a COBOL service that is dispersed across the application, transform the COBOL service to Java with the help of generative AI, then validate the newly generated Java.

Select from the four tracks to begin your product tour.

Track 01

Explain COBOL in detail

A COBOL developer generates and inserts a detailed explanation of some code into her existing program.

Start

Track 02

Refactor application into a new service

A COBOL developer refactors their existing COBOL into a new service.

Start

Track 03

Transform a COBOL service into Java

A Java developer generates Java classes and methods based on a COBOL service.

Start

Track 04

Validate COBOL and Java equivalence

A COBOL and Java developer validate the newly generated Java for semantic equivalence.

Beginner Ai Code Assistant For Gen Z:

Surviving the Algorithm Mike Liu, 2025-09-02 Algorithms now shape what we see how we work and how we understand each other They amplify some voices bury others and quietly decide who gets noticed and who is left behind While many celebrate AI's efficiency and innovation the deeper story is the human struggle to survive in systems we do not control Drawing on decades of experience as a linguist educator and observer of political systems Mike Liu reveals the illusions behind AI's fluency and the dangers of mistaking convenience for consciousness From classrooms in Taiwan to boardrooms shaped by short term politics he shows how survival in the age of AI is not about running faster than machines but about seeing clearly through the illusions they create This book explores three urgent domains 1 Education under pressure Why cramming cultures and outdated teaching models collapse in an AI driven world 2 Politics of survival How factions media cycles and short term power struggles leave nations unprepared for disruption 3 Human projections onto machines Why we sense stubbornness trust illusions or hear a neural accent in AI's voice *Surviving the Algorithm* is not a technical manual It is a survival guide for educators policymakers students and anyone navigating a world where algorithms increasingly define value It challenges us to reclaim clarity purpose and meaning before the noise of machines drowns them out

AI in Social Studies Education Christopher H. Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions Between utopian visions and apocalyptic predictions of AI's impact on education there is a need to thoughtfully consider what education in the age of AI can and should look like This volume focuses on the implications of AI technology for teachers in K 12 and university settings providing a careful look at its affordances and drawbacks for social studies curriculum and teaching Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI This book fills a critical need especially among educators to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno utopianism Whether skeptical or enthusiastic about AI every social studies educator will find something useful to their practice in this book

Book Features First ever compilation of AI considerations and strategies in the context of social studies education Nontechnical explanations of what AI can do and not do in practical educational contexts to enable educators to approach its use with careful judgment Advice for educators to help them assess future iterations of AI technology Critical considerations of AI across multiple contexts e.g. ethics equity multilingual learners cybersecurity Work from leaders in technology and social studies education across Canada and the United States
