The Cyber-Creativity Process Giovanni Emanuele Corazza, 2025-05-23 This edited book explores the process of creating using the seven C s of creativity framework It discusses the creative process as a collaboration between humans and Artificial Intelligence AI here identified as the cyber creativity process Through nine chapters written by leading scholars in the field this collection delves into the rapidly emerging area of Generative AI Gen AI applications and sheds light on the parts of the creative process that will remain fundamentally human throughout the foreseeable future as

well as those that will benefit more from AI augmentation Drawing on the dynamic definition of creativity the contents encompass the Dynamic Universal Creative Process DUCP and the DA VINCI model the design principles of Gen AI algorithms the cyber creativity process in education journalism design fashion music and its implications on intellectual property protection A timely reflection on the complex and evolving relation between creativity and technology this volume will interest academics researchers and students alike across humanities social and hard sciences

Handbook of Research on Using Educational Robotics to Facilitate Student Learning Papadakis, Stamatios, Kalogiannakis, Michail, 2020-12-05 Over the last few years increasing attention has been focused on the development of children's acquisition of 21st century skills and digital competences Consequently many education scholars have argued that teaching technology to young children is vital in keeping up with 21st century employment patterns Technologies such as those that involve robotics or coding apps come at a time when the demand for computing jobs around the globe is at an all time high while its supply is at an all time low There is no doubt that coding with robotics is a wonderful tool for learners of all ages as it provides a catalyst to introduce them to computational thinking algorithmic thinking and project management Additionally recent studies argue that the use of a developmentally appropriate robotics curriculum can help to change negative stereotypes and ideas children may initially have about technology and engineering The Handbook of Research on Using Educational Robotics to Facilitate Student Learning is an edited book that advocates for a new approach to computational thinking and computing education with the use of educational robotics and coding apps The book argues that while learning about computing young people should also have opportunities to create with computing which have a direct impact on their lives and their communities It develops two key dimensions for understanding and developing educational experiences that support students in engaging in computational action 1 computational identity which shows the importance of young people's development of scientific identity for future STEM growth and 2 digital empowerment to instill the belief that they can put their computational identity into action in authentic and meaningful ways Covering subthemes including student competency and assessment programming education and teacher and mentor development this book is ideal for teachers instructional designers educational technology developers school administrators academicians researchers and students

Artificial Intelligence for Marketing Management Park Thaichon, Sara Quach, 2022-11-10 Artificial intelligence AI has driven businesses to adopt new business practices rapidly enhance product development and services has helped to power AI based market intelligence and customer insights and improve customer relationship management This timely book addresses the use of AI in marketing This book also explores the dark side of AI in marketing management and discusses ethics and transparency of automated decision making in AI applications data privacy cyber security issues and biases in various facets of marketing Emerging applications of AI such as DeepFakes which use deep learning technology could increase risks of manipulation and deception Hence apart from leveraging AI capabilities and advantages the book cautions the need for

prevention strategies to deal with potential issues that could arise from the adoption of AI in marketing management This book will provide practical insights into the role of AI in marketing management It will be a useful reference for those researching marketing and marketing professionals *Teaching Coding in K-12 Schools* Therese Keane, Andrew E. Fluck, 2023-02-27 This book contains highly effective ways to teach coding and computational thinking skills throughout primary and secondary schooling It outlines a research informed path for students from birth to 18 years identifying key skills and learning activities Based on global perspectives and research at each stage it outlines how these findings can be applied in the classroom Teaching coding to students in K 12 has been a skillset that has been debated across educational jurisdictions globally for some time The book provides examples of schools that are teaching coding to students in engaging and relevant ways delivering well thought out compulsory curriculums Additionally it provides examples of schools where coding is not mandated in the curriculum and is taught in an ad hoc manner Through the full discussion of all of these varied examples the book presents both sides of the serious and ongoing debate in the field as to whether coding should be taught in an explicit way at all The increasing school of thought that teaching coding is a skill that is already obsolete and the focus should be on computational thinking is completely examined and presented In this book both sides of the argument as well as the specific meticulous research underlying each side are given equal weight The debate is a serious one and requires a clearly defined thematic response with evidence on all sides of the argument presented rationally This book does just that Created by carefully selected authors from around the world it will be a highly studied research reference **Virtual Reality, Artificial Intelligence, and Language Learning** Ulf Schütze, 2024-06-15 It is intriguing and challenging to learn a language by diving into the worlds of Virtual Reality 3 D environments avatars games and Artificial Intelligence chatbots agents What are the issues and benefits of these technological innovations Taking readers on a journey through the brain this book explains how VR and AI may foster and sustain connectivity between language faculties the senses emotions working and long term memory and attention With the speed of technological innovation increasing cognitive demand as well as aspects of intrinsic motivation are analyzed charted and discussed as these may become essential for future development of language learning experiences This volume should be of interest to instructors researchers and students of languages and linguistics cognitive psychology and computer science **Drug Topics** ,1953 *Computer-Human Interaction Research and Applications* Hugo Plácido da Silva, Pietro Cipresso, 2025-03-07 This two volume set CCIS 2370 and CCIS 2371 constitutes the proceedings of the 8th International Conference on Computer Human Interaction Research and Applications CHIRA 2024 held Porto Portugal during November 21 22 2024 The 16 full papers and 45 short papers presented in these volumes were carefully reviewed and selected from 76 submissions These papers focus on the research advancements and practical applications within various areas in the field of Computer Human Interaction including Human Factors and Information Systems Interactive Devices Interaction Design and Adaptive and Intelligent Systems **The Computing**
