## **Crucible Of Beliefs Learning Alliances And World Wars:**

**Crucible of Beliefs** Dan Reiter, 2019-05-15 How do foreign policymakers learn from history When do states enter alliances Why have some small powers chosen to enter alliances whereas others have stayed neutral In *Crucible of Beliefs* Dan Reiter uses work in social psychology and organization theory to build a formative events model of learning in international politics History does inform the decisions of policymakers he suggests but it is history of a specific sort based on firsthand experience in major events such as wars Tested against balance of threat theory the leading realist explanation of alliance behavior Reiter's formative events model of learning emerges as a far better predictor of states decisions *Crucible of Beliefs* shows that contrary to balance of threat theory state leaders ignore the level of international threat and focus instead on avoiding past mistakes and repeating past successes A serious blow to realism these findings demonstrate that to understand the dynamics of world politics it is essential to know how leaders learn from history **Tokens of Power** Ann Hironaka, 2017-03-06 What motivates going to war This book reexamines how leaders make decisions based on appearances of power over military reality *What Causes War?* Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations *Chinese Strategic Culture and Foreign Policy Decision-Making* Huiyun Feng, 2007-06-11 Examining the major academic and policy debates over China's rise and related policy issues this book looks into the motivations and intentions of a rising China Most of the scholarly works on China's rise approach the question at a structural level by looking at the international system and the systemic impact on China's foreign policy Traditional Realist theorists define China as a revisionist power eager to address wrongs done to them in history whilst some cultural and historical analyses attest that China's strategic culture has been offensive despite its weak material capability Huiyun

Feng's path breaking contribution to the debate tests these rival hypotheses by examining systematically the beliefs of contemporary Chinese leaders and their strategic interactions with other states since 1949 when the communist regime came to power. The focus is on tracing the historical roots of Chinese strategic culture and its links to the decision making of six key Chinese leaders via their belief systems. Chinese Strategic Culture will be of interest to students of Chinese politics, foreign policy, strategic theory and international relations in general.

Small States and Alliances Erich Reiter, Heinz Gärtner, 2013-03-09. The book focuses on the relations between small states and alliances. It is on why, how and under what conditions states engage in alliances. What are the benefits and costs of alliances? How are the benefits and costs of alliances allocated among their members? What determines who allies with whom? Can small states still pursue their own security interests within an alliance? Can they even become an integral part of an alliance? Scholars, practitioners, policy makers and advisors from several countries discuss these issues. They address historical, empirical and theoretical topics and give policy recommendations.

*Coalition Politics and the Iraq War* Daniel F. Baltrusaitis, 2010. Why do states join ad hoc military coalitions? What motivated South Korea to contribute significantly to the Iraq War coalition of the willing while such steadfast allies as Turkey and Germany resisted US pressure to become burden sharing partners? Drawing on his extensive examination of South Korean, German and Turkish politics in the approach to and during the Iraq War, Daniel Baltrusaitis offers an in depth analysis of how domestic political dynamics critically influence a state's level of material and diplomatic support to coalitions of choice.

**The Norwegian Armed Forces and Defense Policy, 1905-1955** David Thompson, 2004. Thompson presents a history of the changes in Norway's defense policy during the first fifty years following its independence from Sweden. Particular attention has been paid to the effects of the German occupation of 1940-1945 on the later development of the nation's defense policy. Thompson teaches history at Illinois Central College.
