Permian-Triassic Tethyan Orogeny along the Southern Eurasian Margin Mingcai Hou, Fuhao Xiong, Changqian Ma, Gillian Foulger, Shengyao Yu, 2023-02-07 The Variscan Orogeny K. Schulmann, J.R. Martínez Catalán, J.M. Lardeaux, V. Janousek, G. Oggiano, 2014-07-28 This volume summarizes the state of the art of Variscan geology from Iberia to the Bohemian Massif The European Variscan belt consists of two orogens the older northern and the younger southern The northern Variscan realm was dominated by Late Devonian Carboniferous rifting subduction and collisional events as defined by sedimentary records crustal growth recycling of continental crust and large scale deformations In contrast the southern European crust was reworked by major Late Carboniferous collision followed by Permian wrenching The Late Carboniferous Permian orogeny overprinted the previously accreted system in the north but with much lower intensity resulting in magmatic recycling and extensional tectonics These two main orogenic cycles do not reflect episodic evolution of a single orogenic system but a complete change in orientation of stress field thermal regime degree of reworking and recycling of European crust reflecting a major switch in plate configurations at the Early Late Carboniferous boundary *The Geology of Central Europe: Precambrian and Palaeozoic* Tom McCann, 2008 Publishers Weekly Top 10 Best of the Year In her new collection Story Prize finalist Maureen F McHugh delves into the dark heart of contemporary life and life five minutes from now and how easy it is to mix up one with the other Her stories are post bird flu in the middle of medical trials wondering if our computers are smarter than us wondering when our jobs are going to be outsourced overseas wondering if we are who we say we are and not sure what we do to survive the coming zombie plague Praise for Maureen F McHugh Gorgeously crafted stories Nancy Pearl NPR Hauntingly beautiful Booklist Unpredictable and poetic work The Plain Dealer Maureen F McHugh has lived in New York Shijiazhuang China Ohio Austin Texas and now lives in Los Angeles California She is the author of a Story Prize finalist collection Mothers Other Monsters and four novels including Tiptree Award winner China Mountain Zhang and New York Times editor's choice Nekropolis McHugh has also worked on alternate reality games for Halo 2 The Watchmen and Nine Inch Nails among others io9 Best SF F Books of 2011 Tiptree Award Honor List Philip K Dick Award finalist Story Prize Notable Book **Linkages and Feedbacks in Orogenic Systems** Richard D. tectonic processes through a series of field numerical and laboratory based studies concentrating on feedback mechanisms within ancient and evolving orogens by which individual or linked tectonic processes may influence or predetermine the operation of other processes in space and time Case studies cover a wide range of ancient to modern orogens the Svecofennian of southern Finland the Gyeonggi Massif of Korea the Caledonides of northern Scotland the Variscan of the East European craton the Appalachians of the eastern United States the European Alps and Dinarides north Cascades of the northwestern United States and the Himalaya Emphasis is placed on integration between data sets developed from a wide range of analytical approaches including field mapping seismic reflection profiling strain analyses petrology isotopic dating and numerical modeling based studies of thermal evolution associated with tectonic processes such as thrust related burial and exhumation The Third Hutton Symposium on the Origin of Granites and Related Rocks M. history of the Earth As a precursor to these papers the rheology of the Earth's lithosphere through time is reviewed Theoretical analysis and insight into the behaviour of the lithosphere of other planets constrain mechanical considerations of the Earth's lithosphere It is clear from these overviews that geodynamic concepts and modelling and new techniques such as deep seismic profiling and geochronology are having a profound impact on orogenic studies Tectonic Growth of a Collisional Continental Margin Kenneth D.
