Solving Problems Without Large Government George Liebmann,2000-04-30 Solving Problems Without Large Government circumvents sterile discussions of federalism and privatization by discussing the potential role of sub local government assisted entities in providing effective and fair access to services Some readers will be astonished at the numerous examples of vital social functions which have already been handled at this level in a variety of societies throughout history The proper use of small institutions Liebmann argues can actually serve to foster greater economic equity and political power

Higher Education in England and France Since the 1980s Cécile Deer,2002 This book provides a synthetic analysis of the rapid developments that have occurred in English and French higher education since the beginning of the 1980s The purpose is not to decide which of the two systems is better today nor is it about formulating advice on policy or best practice borrowing The aim is to identify and clarify converging or diverging trends and policies ideals and structures between the two countries since the 1980s in order to build a cross national understanding of changes in this area of public policy The book is conceived as a follow up to the framework of understanding developed by Margaret Archer in Social

Origins of Educational Systems 1979 First change is comprehensively interpreted using this approach Then the power of other explanatory frameworks in particular that developed by Niklas Luhmann and contradicted by Jürgen Habermas is assessed so as to determine which provides the most convincing account to help understand the recent developments observed Far from being antithetical the three models of understanding of social evolution morphogenesis self differentiation and communicative action prove to be rich in potential for cross fertilisation *Local Government in the Modern State* Martin Loughlin, 1986 *Issues in Deaf Education* Ruth Swanwick, 2012-12-06 The way in which education is provided for deaf children is changing as are the demands made on teachers both in special settings and in mainstream schools This book offers a comprehensive account of recent research and current issues in educational policy psychology linguistics and audiology as they relate to the education of the deaf and includes detailed information about further reading It should be of interest to student teachers and teachers of the deaf teachers in mainstream schools academics working in the area of deafness and disability audiologists and cochlear implant teams parents of deaf children and members of the deaf community
