Cruisers Of World War Two:

German Light Cruisers of World War II Gerhard Koop, Klaus-Peter Schmolke, 2014-07-22 An immensely interesting look at the Emden Königsberg Karlsruhe Köln Leipzig and Nürnberg ships from drawing board to destiny War History Online The warships of the World War II era German Navy are among the most popular subject in naval history with an almost uncountable number of books devoted to them However for a concise but authoritative summary of the design history and careers of the major surface ships it is difficult to beat a series of six volumes written by Gerhard Koop and illustrated by Klaus Peter Schmolke Each contains an account of the development of a particular class a detailed description of the ships with full technical details and an outline of their service heavily illustrated with plans battle maps and a substantial collection of photographs These have been out of print for ten years or more and are now much sought after by enthusiasts and collectors so this new modestly priced reprint of the series will be widely welcomed This volume is devoted to the six ships from Emden to Nürnberg that were built between the wars They were primarily intended for commerce raiding but the war gave them few opportunities for such employment although they did provide useful support for key naval operations in the Baltic and North Sea Two were lost in the 1940 Norway campaign but the remainder survived for most of the conflict A ship by ship history of the cruisers The text is supported by an excellent collection of plans and photographs Overall this is a very impressive history of a fairly unimpressive set of warships HistoryOfWar.org

German Cruisers of World War II in Action Robert C. Stern, Don Greer, David Gebhardt, 2005-01-01 Cruisers that fought in WWII descended from sail powered frigates of the 18th and 19th century These vessels were designed for long range independent operation cruising to gain information about the movement of an enemy to raid the enemy's commerce or to track down enemy commerce raiders This title covers Germany's WWII Light and Heavy Cruisers of the Kriegsmarine Included are the Light Cruisers Emden Karlsruhe Köln Königs Leipzig and Nürnberg and the Heavy Cruisers Admiral Hipper Blücher and Prinz Eugen Also covers Z Plan and Shipboard Aircraft Illustrated with 120 b/w photos 6 color profiles 19 b/w line drawings 50 pages *Japanese Heavy Cruisers of WWII in Action* Wayne Patton, 2006 Japan entered World War II with the third largest navy in the world after those of Great Britain and the United States The 18 heavy cruisers of the Imperial Japanese Navy were a combined force of large and powerful ships designed for attack rather than defense Long low to the water heavy and fast they looked like no other nation's cruisers with their flush decks and curved hulls topped off with large pagoda like tower bridges Designers of the heavy cruisers gave them a highly original arrangement of curved funnels turrets and masts They were at once beautiful and deadly as they sliced through the waves on their way to Pacific battles Packed with more than 90 black and white photos six color profiles and line drawings **Japanese Light Cruisers of World War II in Action** Wayne Patton, 2006-05-11 At the beginning of World War II the Imperial Japanese Navy operated a light cruiser force of 20 ships and added another five during the course of the war These fast ships carrying seaplanes and heavy torpedo armament generally were used as

flagships for destroyer flotillas and submarine squadrons Of these nine were sunk by U S or British submarines 11 were sunk by U S aircraft two were sunk by U S torpedo boats or destroyers and three were still afloat at the end of the war Includes never before published photos US Heavy Cruisers 1943-75 Mark Stille,2014-09-20 A companion book to US Heavy Cruisers 1941 45 this is a guide to those cruisers built in the later years of World War II and beyond together forming the definitive guide to the US s heavy cruiser classes Versatile warships the heavy cruisers of the Baltimore class and their successors in the Oregon City and Des Moines classes commonly acted as carrier escorts throughout World War II but also performed bombardment duties in support of amphibious landings Post World War II the heavy cruisers continued to see service chiefly in Korea and Vietnam Even after the heyday of the heavy cruiser had passed the ships continued to serve several were converted into the earliest examples of guided missile cruisers and created an enduring legacy in the US Navy From an established expert on the US and Pacific naval history this is an invaluable resource richly illustrated with artwork and photographs

Italian Cruisers of World War II Mark Stille,2018-05-31 The Italian Royal Navy Regia Marina operated one of largest cruiser forces of World War II As a signatory to the 1922 Washington Naval Treaty the Regia Marina immediately attempted to reinforce its treaty limited battleship force by building seven large 10 000 ton heavy cruisers Italian light cruisers also possessed an interesting design history and were involved in every major fleet engagement in the Mediterranean as well as several smaller encounters with units of the British Royal Navy Fully illustrated with specially commissioned artwork this fascinating volume examines the history of the Regia Marina s cruisers during World War II where they came up against the might of the British Royal Navy *German Cruisers of World War Two* M. J. Whitley,1985

The Modern Cruiser Robert C. Stern,2020-03-30 An entertaining and informative review of the evolution of one of the most important classes of warship from the technology of WWII into the missile age Firetrench Cruisers probably vary more in their characteristics than any other warship type and have certainly been subject to the most convoluted development There was always a basic tension between quantity and quality between numbers and unit size but at a more detailed level every one of the naval powers made different demands of their cruiser designers This makes the story of cruiser evolution in the world s major navies fascinating but complex This book sets out to provide a coherent history of the fortunes of this ship type in the twentieth century beginning with a brief summary of development before the First World War and an account of a few notable cruiser actions during that conflict that helped define what cruisers would look like in the post war world The core of the book is devoted to the impact of the naval disarmament treaty process which concentrated to a great extent on attempting to define limits to the numbers and size of cruisers that could be built in the process creating the treaty cruiser as a type that had never existed before and that existed solely because of the treaty process How the cruisers of the treaty era performed in the Second World War forms the final focus of this interesting well written and well grounded book which concludes with a look at the fate of the cruiser type since 1945 Warship International The result is probably the best single

volume account of the subject to date *World War Two in Europe* David T. Zabecki, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *The Encyclopedia of Weapons of World War II* Chris Bishop, 2002 A lavishly illustrated compendium of military hardware covers everything that fought in the air on the ground and on the seas during World War II There are more than 500 separate items of equipment used between 1939 and 1945 from combat handguns to massive aircraft carriers More than 600 full color artworks accompany entries that feature a detailed history of each weapon s design and development along with a full specifications table that includes performance dimensions armament and crew details A must have for military buffs **US Navy Light Cruisers 1941-45** Mark Stille, 2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy antiaircraft weaponry as well as the traditional 6in guns With the speed and range to keep up with aircraft carriers and their considerable antiaircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond **Cruisers** ,1994 **American Cruisers of World War II** Steve Ewing, 1984

Cruisers of World War Two Ivan Gogin, 2023-07-13 This series is based on the Warships of World War II series of reference books and is intended for those readers who are interested in certain types of ships It is no secret that reference information for example on US Navy landing craft which occupies several hundred pages of the fourth volume which according to the logic of our reference books must be present there will be redundant for readers interested for example only in large ships The same applies to fans of various wargames or those who simulate naval battles these categories of readers are mainly interested in the main combat ship types On the other hand alas the cost of printing logistics and related costs is constantly growing the total cost of four books in the series has exceeded 200 and it is difficult to imagine that a potential reader wants to spend an extra ten dollars for an extra hundred pages of text he does not need To be honest I myself am like that and when deciding to purchase a particular book I also pay close attention to its price In connection with the foregoing a new series of brief reference books on the main types of warships was created including the following volumes 1 capital ships 2 aircraft carrying ships 3 cruisers 4 destroyers and torpedo boats 5 submarines This book is the third in a series of guides to types of ships dedicated to cruisers heavy large and light cruisers armored and protected cruisers unprotected cruisers cruisers minelayers cruisers seaplane tenders **Soviet Cruisers 1917-45** Alexander Hill, 2024-03-28 A history of the Soviet Navy s cruisers from the opening shots of the October Revolution through to the combat they saw during World War II The Soviet Navy of World War II boasted a cruiser fleet that was among the most eclectic to see service In this book noted military historian and Soviet specialist Alexander Hill explains the role of cruisers in the Soviet Navy from the dramatic days of the October Revolution of 1917 through to the struggle they fought with Nazi Germany during World War II Illustrated

throughout with rare photos and original artwork including a cutaway of Aurora famous for its role in the Bolshevik October Revolution and with profiles of the key classes this book outlines the Soviets development of a cruiser force Having inherited a number of cruisers from the Imperial Russian Navy the new Soviet Navy went on to complete two unfinished Tsarist light cruisers during the 1920s In the late 1930s the Soviets built their first large warships the Kirov class and in 1940 Nazi Germany sold the unfinished heavy cruiser L tzow to the USSR The final cruiser sized warship to see action was the former Imperial royal yacht Shtandart renamed Marti and armed as a minelayer which was used in the defence of Leningrad

Researched in the main from Russian language sources this study explores the cruiser fleet that saw considerable action in World War II particularly in support of the Red Army *Cruisers of World War Two* M. J. Whitley,1995 US Heavy Cruisers 1941-45 Mark Stille,2014-04-20 Designed and produced under the regulations of the Washington Naval Treaty the heavy cruisers of the Pensacola Northampton Portland New Orleans and Wichita classes were exercises in compromise While they possessed very heavy armament the Pensacolas for example carrying a main battery of ten 8 guns this came at the cost of protection armor was the same thickness as a gun cruiser and incapable of protecting the vessels from enemy 8 fire As the classes evolved these flaws began to be corrected with the main battery being reduced and increased protection being added to the vital areas of the ship Despite these drawbacks the pre war heavy cruiser classes served with distinction throughout World War II *German Heavy Cruisers vs Royal Navy Heavy Cruisers* Mark Lardas,2021-08-19 This superbly illustrated study explores the epic clashes of British and German heavy cruisers at the beginning of World War II The opposing heavy cruisers of the German Kriegsmarine and the Royal Navy engaged in a global game of cat and mouse during the opening years of World War II This was a period in which the heavy cruiser still reigned supreme in open waters with the opposing sides reluctant to risk their battleships and aircraft yet to dominate the seas These swift vessels fought each other in the South Atlantic North Atlantic the frigid waters of the Denmark Strait and the Arctic approaches to Russia capturing the public imagination in the process This fascinating and beautifully illustrated book examines the design development and technical performance of these opposing warships and explores the clashes between them at the Battle of the River Plate in December 1939 the Christmas Day Battle 1940 and the Battle of the Denmark Strait in May 1941 The ships examined include the Deutschland class Panzerschiffe and Admiral Hipper class cruisers and the Royal Navy County and York class heavy cruisers *Heavy Cruisers of the Admiral Hipper and the Prinz Eugen Class* Mirosław Skwiot,2010 Exceptional reference guide for modelers and historians This lavishly illustrated volume in the War Camera Photobooks series presents a detailed photo history of the heavy cruisers which served with the German Navy the Kriegsmarine during World War II The heavy cruiser was a type of naval warship designed for long range high speed and an armament of naval guns roughly 203mm caliber 8 inches The heavy cruiser can be seen as a lineage of ship design from 1915 until 1945 although the term heavy cruiser only came into formal use in 1930 The heavy cruiser s immediate precursors were the light cruiser designs of the

1900s and 1910s rather than the armored cruisers of before 1905 With numerous aerial close up profile and in action photographs this book is an exceptional reference guide for both modelers and historians alike About the Series This lavishly illustrated new series presents a detailed photo history of the key machines used during warfare With aerial close up plan view and profile photography War Camera Photobooks are dedicated tributes to the supreme machinery of military technology **The Royal Navy in World War Two** Derek G. Law,1988
