Cryobanking The Genetic Resource:

Cryobanking the Genetic Resource Paul Watson, William V. Holt, 2001-02-16 There is a growing awareness of a worldwide reduction in biodiversity and the urgent need to develop ways to redress the problem This is the first major book devoted to the subject of genetic resource banking GRB and its role in preserving global animal biodiversity In Cryobanking the Genetic Resource expert contributors provide the non specialist with an overview of the subject and the practical techniques associated with GRB The book presents a basic introduction to the concepts and then points the way to relevant literature for those who wish to develop practical applications The first section deals with the potential contribution of GRB to biodiversity protection while the second section offers an introduction to the basic cryobiology of gametes and embryos In the first section genetic considerations for planning interventions are discussed together with disease control measures This section explores related reproductive technologies necessary for the use of cryopreserved gametes and embryos as well as a range of other issues such as ownership and security of stored material and the size and location of cryopreserved material The second section offers a thorough review of the literature on cryopreservation of spermatozoa oocytes and embryos It gathers species into related groups for ease of reference and does not assume extensive specialist knowledge so that newcomers to the field can make the best use of the available research This book is an essential resource for zoologists and conservationists with an interest in genetic management and captive breeding and also for students involved in biodiversity issues conservation and assisted reproduction **Official Program, Thursday, Jan. 13, 1910, Pasadena Day ,1910**

Conservation and Utilization of Horticultural Genetic Resources P.E. Rajasekharan, V. Ramanatha Rao, 2019-06-25 The conservation of crop genetic resources is one of the important elements in efforts to sustainably increase agricultural production in low income countries and to guarantee long term food security especially for the low income population groups in these countries Horticultural crops as high value crops have an important role to play in revitalizing rural economies and can add significantly to national economies Moreover horticulture provides more than twice the number of jobs compared to traditional cereal crop production and the shifting of conventional agriculture towards high value horticulture has increased employment opportunities in developing countries To exploit this potential researchers need a vast array of horticultural genetic resources and information on new traits Horticultural crops which are only a part of PGRFA Plant Genetic Resources for Food and Agriculture are characterized by a wide and varied range of species In fact there are five major horticultural crop groups fruit and nut crops vegetables food legumes roots and tubers and lastly the ornamental and medicinal group In this context the present book provides a comprehensive overview of the current state of conservation and utilization of horticultural genetic resources addressing contemporary approaches to conservation in connection with different technologies including biotechnological approaches as practised in India and in some cases globally It includes a brief chapter on the unique nature of horticultural genetic resources providing a rationale for viewing them as being distinct from

field crop genetic resources Subsequent chapters share insights on protocols for the conservation of selected horticultural crops ex situ and focus on the increased need to complement these efforts with in situ conservation approaches Geospatial tools are also briefly described emphasizing their utility with regard to mapping and managing resources The book also explores the wild gene pool in horticulture crops discusses legal aspects related to horticultural genetic resources and biotechnological aspects and describes the key aspects of sustainable management and replenishment Given its scope the book offers a valuable resource for all horticulturists graduate students researchers policymakers conservationists and NGOs engaged in horticulture in particular and biodiversity in general

Conservation of Plant Genetic Resources Saikat Gantait,Paweł Chmielarz,2025-08-05 This book discusses validated in vitro biotechnological interventions that have reshaped the landscape of plant genetic resource conservation It covers essential topics such as collection processes disease indexing in vitro culture establishment multiplication techniques and storage solutions ranging from short to long term strategies like cryopreservation By addressing the challenges of ex situ conservation management this work offers a guide to preserving rare and endangered plants against the backdrop of climate change and unsustainable utilization The chapters delve into critical themes such as slow growth strategies and synthetic seed technology for mid term storage solutions This book is for academicians postgraduate students and researchers in botany and plant biotechnology sectors as well as molecular biologists and conservation enthusiasts
