Cscw And Artificial Intelligence Computer Supported Cooperative Work:

CSCW and Artificial Intelligence John H. Connolly, Ernest A. Edmonds, 2012-12-06 Computing despite the relative brevity of its history has already evolved into a subject in which a fairly large number of subdisciplines can be identified. Moreover, there has been a noticeable tendency for the different branches of the subject each to develop its own intellectual culture, tradition, and momentum. This is not of course to suggest that any individual subdiscipline has become a watertight compartment or that developments in one branch of the subject have tended to take place in total isolation from developments in other related areas. Nevertheless, it does mean that a deliberate effort is required in order to bring different subdisciplines together in a fruitful and beneficial manner. Artificial Intelligence, AI, and Computer Supported Cooperative Work, CSCW, jointly constitute a good example of two branches of computing that have emerged separately and given rise to largely distinct research communities and initiatives. On the one hand, the history of AI can be traced back to the 1950s, the term II Artificial Intelligence being generally attributed to John McCarthy, who first used it in print in 1956. Computer Supported Cooperative Work, on the other hand, is a term of more recent coinage, having been devised by Irene Greif and Paul Cashman in 1984. *Studies in Computer Supported Cooperative Work* John M. Bowers, Steve Benford, 1991 Computer Supported Cooperative Work, CSCW, examines the possibilities and effects of technological support for humans involved in group communication and work processes. Attention has been devoted to how humans might interact, not so much with computers but with each other, through computer-based technology. Based on papers delivered at a conference, topics are dealt with under six sections: the concept of CSCW, generic models and configurable systems, empirical studies of cooperative work and system use, infrastructure for CSCW, CSCW and design principles and practices. CSCW John H. Connolly, Ernest A. Edmonds, 1998 **Computer Supported Cooperative Work and Social Computing** Hailong Sun, Hongfei Fan, Yongqiang Gao, Xiaokang Wang, Dongning Liu, Bowen Du, Tun Lu, 2025-03-04 This two-part LNCS volume constitutes the refereed proceedings of the 19th CCF Conference on Computer Supported Cooperative Work and Social Computing, Chinese CSCW 2024, held in Hohhot, China, in July 12-14, 2024. The 52 full papers and 18 short papers included in this book were carefully reviewed and selected from 200 submissions. They were organized in topical sections as follows: Part I: Trend, CSCW and Social Computing, and Human-Machine Things Fusion and Human-AI Collaborative Computing; Part II: Crowd Cooperative Computing and Evolutionary Computation, and Collaborative Data, Software, and Services. **Agent Supported Cooperative Work** Yiming Ye, E. Churchill, 2012-12-06 Improvements in computer networking have heralded great expectations for computer-mediated distributed work. However, experience has revealed that as information flow improves, a central problem for distributed workers is the administration, management, and control of that information. Research into Computer Supported Cooperative Work, CSCW, investigates design methods and technologies for the support of collaboration, communication, and coordination of distributed group work both within and among organizations. In tandem

with this focus on the support of distributed communication and collaboration there have been exciting developments in the fields of Intelligent Agents and Distributed Artificial Intelligence DAI notably in the concepts theories and deployment of intelligent agents as a means of distributing computer based problem solving expertise The paradigm of multi agent systems forms a proposed basis for the design of CSCW architectures the support of CSCW operations and for addressing some of the problems of cooperative working The application of a multi agent approach to CSCW makes information exchange among the participants easier by delivering support to the participants assisting workflows and procedures and providing convenient user interfaces to CSCW systems Furthermore the ideas inherent in such an approach are also applicable to other domains such as support for interactive learning Organizations that seek to exploit the advantages offered through CSCW will benefit from the integration of agents in the management and use of their corporate knowledge especially with the advancement of wired or wireless networking pervasive computing and other information technologies Agent Supported Cooperative Work describes the state of the art in this exciting new area covering both theoretical foundations and practical applications of ASCW It is the first book explicitly dedicated to ASCW bringingtogether contributions from international experts in the field

Cooperation Among Organizations Richard J.D. Power, 2012-12-06 This book reports research conducted in the ESPRIT project PECOS which investigated the requirements for effective CSCW Computer Supported Cooperative Work with special reference to cooperation among organisations in large projects It indicates commercial areas where CSCW technology can be applied and examines such methodological issues as enterprise modelling system architecture and the incorporation of artificial intelligence techniques PECOS studied two practical contexts The first was the management of a complex industrial project the construction of a high speed train for the Italian railway which required cooperation among four private companies The second was the design of an information system for water management in the Lombardy region which required cooperation among several different branches of public administration these contexts were analysed applying techniques of enterprise modelling in order to identify requirements for CSCW systems The composition of the book is as follows Chapter 1 presents some highlights of the vast literature on cooperation including results from psychology sociology management science linguistics and artificial intelligence Chapter 2 reviews the much shorter history of CSCW with reference to a catalogue of existing systems given in an appendix at the end of the book The next four chapters contain our original findings

Readings in Groupware and Computer-supported Cooperative Work Ronald M. Baecker, 1993 This comprehensive introduction to the field represents the best of the published literature on groupware and computer supported cooperative work CSCW The papers were chosen for their breadth of coverage of the field their clarity of expression and presentation their excellence in terms of technical innovation or behavioral insight their historical significance and their utility as sources for further reading sourcebook to the field development or purchase of groupware technology as well as for researchers and managers groupware and human computer interaction Readings in Groupware

Collaboration Helen Donelan,Karen Kear,Magnus Ramage,2012-07-26 Communication and collaboration via the Internet has risen to great prominence in recent years especially with the rise of social networking Web 2.0 and virtual worlds Many interesting and worthwhile studies have been conducted on the technology involved and the way it is used and shaped by its user communities From some of the more popular coverage of these interactions it might be thought that these are new phenomena However they draw on a rich heritage of technologies and interactions Online communication and collaboration presents a very timely set of articles that cover a range of different perspectives upon these themes both classic and contemporary It is unusually broad in the range of technologies it considers many books on these topics cover only a few forms of collaboration technology and in considering well established technologies as well as recent ones It blends academic and popular articles to combine scholarly rigour with readability The book is divided into eight sections covering the foundations of online communication and collaboration together with current collaboration technologies such as wikis instant

messaging virtual worlds and social network sites These modern communication tools are considered in terms of their interactions but also looking back at lessons to be learnt from their technological ancestors The book also contains an extended case study of online collaboration taking open source software as its example Online communication and collaboration will be of relevance in a wide range of higher education courses in fields related to soft computing information systems cultural and media studies and communications theory

Design Issues in CSCW Duska

Rosenberg, Christopher Hutchison, 2013-12-01 One of the most significant developments in computing over the last ten years has been the growth of interest in computer based support for people working together Recognition that much work done in offices is essentially group work has led to the emergence of a distinct subfield of computer science under the title Computer Supported Cooperative Work CSCW Since the term was first coined in 1984 there has been growing awareness of the relevance to the field of and the valuable contributions to be made by non computing disciplines such as sociology management science social psychology and anthropology This volume addresses design issues in CSCW and since this topic crucially involves human as well as technical considerations brings together researchers from such a broad range of disciplines Most of the chapters in this volume were originally presented as papers at the one day seminar Design Issues in CSCW held at the Department of Trade and Industry DTI London on 17 March 1992 one in a series of DTI supported CSCW SIG seminars We would like to express our gratitude to the series editors Colston Sanger and Dan Diaper for their useful comments on and suggestions for revisions to the final draft of the manuscript to Linda Schofield our editor at Springer for her continued encouragement throughout the preparation of the manuscript and finally to our respective families for their support and patience over so many months *SIGGROUP Bulletin* ,1997 **Proceedings** ,1999
