

Capsular Tension Rings

- CTRs stabilize the zonular apparatus through the centrifugal force of an open PMMA ring.
- The diameter of the CTR slightly exceed that of the capsular bag.
- Once implanted it expands and centrates the capsular apparatus, supporting the weak zonules and recruiting tension from existing stronger zonules.
- **The first capsular tension silicone ring implanted into the rabbit eyes in 1991 by T. Hara.**
- After modifications by Nagamoto and Bissen-Miyajima the first CTR was implanted during cataract surgery into a human in 1993.
