Ethics and Publishing: Breakthroughs in Research and Practice Management Association, Information

Resources, 2019-03-01 A vital component of any publishing project is the ethical dimensions which can refer to varied

categories of practice from conducting a proper peer review to using proper citation in research. With the implementation of technology in research and publishing, it is important for today's researchers to address the standards of scientific research and publishing practices to avoid unethical behavior. *Scholarly Ethics and Publishing: Breakthroughs in Research and Practice* is an essential reference source that discusses various aspects of ethical values in academic settings, including methods and tools to prevent and detect plagiarism, strategies for the principled gathering of data, and best practices for conducting and citing research. It also assists researchers in navigating the field of scholarly publishing through a careful analysis of multidisciplinary research topics and recent trends in the industry. Highlighting a range of pertinent topics such as academic writing, publication process, and research methodologies, this publication is an ideal reference source for researchers, graduate students, academicians, librarians, scholars, and industry-leading experts around the globe. Leadership in Academic Libraries Today Bradford Lee Eden, Jody Condit Fagan, 2014-03-14. *Leadership in Academic Libraries* highlights model examples of the move from leadership theory into actual practice. A consideration of leadership theories provides a working vocabulary to facilitate discussions of abstract concepts, while specific topical investigations and case studies illustrate those concepts and show the manner in which theories play out in practice. Chapter authors speak from experience as well as theoretical grounding and include practitioners, researchers, and formal and informal leaders. Topics include transformational leadership across generations, developing a research agenda in library leadership, methodologies for studying library leadership, connections between leadership models and library-focused research, engaging with business psychology and educational administration literature, leadership styles, organizational culture, the role of mentoring in leadership, and the role of women in academic library leadership. Two chapters highlight the dichotomy between positional leadership and socially constructed leadership roles. The research methods used include case study, survey, and action research. Extensive bibliographies for each chapter provide a solid foundation for further research. *Principles and Practice of Sport Management with Navigate*
