Effective Technology Transfer In Biotechnology: Best Practice Case Studies In Europe Oliver Uecke, Robin De Cock, Bart Clarysse, Thomas Crispeels, 2015-01-06 Biotechnology is referred to as one of the key enabling technologies of the 21st century. It has the potential to offer solutions for a number of health and resource based problems the world is facing such as unmet medical needs and fossil fuel dependency. Considerable effort and investment has been expended in recent years to try and improve the outcomes of technology transfer in order to fulfill this potential. This book presents seventeen best practice case studies on the topic of effective technology transfer in biotechnology. The selected case studies focus on technology transfer offices, funding models, incubators, education and clusters. Each presents an overview of an initiative that was deployed in Europe with the aim of supporting and stimulating the transfer of biotechnology discoveries and technologies from research laboratories to society. Readers are provided with a critical assessment of each initiative and policy makers, entrepreneurs, cluster managers and research institute managers will find inspiring lessons they can draw on when developing and implementing similar initiatives elsewhere. These cases are the product of research undertaken as part of the ETTBio Effective Technology Transfer in Biotechnology project, co-financed by the European Union ERDF European Regional Development Fund and made possible by the INTERREG IVC Programme. ETTBio commenced in January 2012 and concluded in December 2014.
