Robot Thomas Riccio, 2024-06-14 This book considers David Hanson's robots as a performative expression of our cultural moment serving as a paradigm for the evolution of humanoid social robots. Mechanical beings have occupied the human imagination since antiquity. Now they inhabit the pop cultural imagination embodying the apotheosis of humanity's technological aspirations and dread. Sophia, Hanson's most advanced robot, anticipates the future as she articulates the mythic pattern, narrative anxieties and hopes as old as humanity. Gendered as an attractive female with a face inspired by Queen Nefertiti and Audrey Hepburn, Sophia is a cipher avatar and turning point that brings humanity and technology a step closer to the emergence of a post-human species. The author is a transdisciplinary artist, scholar, educator working internationally in experimental performance, indigenous performance, ritual, shamanism and social robotics. Hanson's robots and Sophia are examined as performance media and events as characters evolving as post-human narratives of technological beings. The emergent complex and collaborative relationships social robots have with technology, AI, performance, anthropology, mythology, psychology, sociology, popular culture, social media, politics and economics are considered. **Farm Life and Agricultural Epitomist**, 1911 **Book Review Digest**, 1967 Excerpts from and citations to reviews of more than 8,000 books each year drawn from coverage of 109 publications.
