future isn't written. It's ours to create. *The Co-evolution of Technology and Warfare* Tracey German, Fotios Moustakis, Andrew N. Liaropoulos, 2025-09-30. This book explores the relationship between technology and warfare by examining how recent technological advancements have revolutionized the conduct of war. The work analyses contemporary conflicts including the Syrian civil war, the Taliban takeover in Afghanistan, and the ongoing war in Ukraine, but also by exploring future war scenarios and assessing the military capabilities of major powers. In doing so, the book highlights the dynamic and evolving nature of modern warfare. It goes beyond a simple examination of technological advancements, addressing the complexities of modern warfare, scrutinizing the strategies employed by states to adopt and develop military technologies, while emphasizing the importance of technology in shaping military planning, training, research, and innovation. The book provides a collection of timely contributions by leading scholars and practitioners in the military and security field. Furthermore, the contributors identify potential challenges and risks associated with the widespread adoption of technologies in warfare and propose recommendations for policymakers to address issues that relate to military planning and training, research and development, and resilience building. This book will be of much interest to students of security studies, technology studies, defence studies, and International Relations. Media Management and Artificial Intelligence Alex Connock, 2022-11-18. This cutting-edge textbook examines contemporary media business models in the context of Artificial Intelligence (AI) and digital transformation. AI has dramatically impacted media production and distribution, from recommendation engines to synthetic humans, from video to text tools to natural language models. AI is really the change agent of the media industry. Answered a natural language generation model when AI was asked about the subject of this book. It will open incredible opportunities. This book seeks to explore them. The media is examined through four sections: Principles, maps business models and the key tools of AI; Platforms, covers distribution channels in Games, Streamers, Social Networks, Broadcast, and Digital Publishing; Producers, covers the engines of content making, including Scripted Entertainment, Factual Content, Marketing, Creators, and Music; Finally, Pioneers, covers emerging sectors of Podcasting, Esports, the Metaverse, and other AI-driven developments. Then, in each chapter, a standard value creation model is applied, mapping a single sector through development, production, distribution, and monetisation. Diverse case studies are analysed from India, Nigeria, South Korea, South Africa, France, the Netherlands, the US, the UK, Denmark, and China, around creative entrepreneurship, revenue models, profit drivers, rights, and emerging AI tools. Questions are provided for each case, whilst chapter summaries cement learning. Applied and technology-focused, this text offers core reading for advanced undergraduate and postgraduates studying Media Management or the relationship between Entertainment Media and Technology. Online resources include chapter-by-chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies.
