must read for those who are working on or with virtual teams It provides methods for continual assessment and learning in developing high levels of creativity in virtual teams This book is an important resource for teams transitioning into this new way of working Nancy Sarti manager employee development Southern California Edison This is the first serious study of creativity in virtual teams It offers a comprehensive framework and valuable assessment tools for putting the book s lessons into practice in any organization Vijay Sathe The Peter F Drucker Graduate School of Management Claremont Graduate University author Corporate Entrepreneurship Handbook of Online Learning Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments Improving Business Communication Skills Deborah Britt Roebuck, 2001 This clear concise user

friendly book strives to deliver vital communication skills that future professionals need to be successful in both their careers and personal lives It offers readers the opportunity to involve themselves in the subject matter in a creative self directed fashion thus enhancing the learning process The book provides readers with complete guidelines for writing letters memos and reports preparing and delivering presentations and using technology to communicate For individuals in need of a review or introduction of business communication skills     **Leadership Resources** ,2000     *Virtual Technologies* Jerzy Kisielnicki,2008 This publication presents encompassing research of the concepts and realities involved in the field of virtual communities and technologies Provided by publisher     **The National Guide to Educational Credit for Training Programs** American Council on Education,2005 Highlights over 6 000 educational programs offered by business labor unions schools training suppliers professional and voluntary associations and government agencies     **Excellence in Practice** Scott Cheney,1997     Proceedings of the Virtual Worlds and Simulation Conference (VWSIM '98) Christopher Landauer,Kirstie L.
