evidence that they improve patient outcomes but the risks they pose have less to do with technological shortcomings than the application of deeply flawed psychiatric models of mental disorder at unprecedented scale Oberhaus became interested in the subject of mental health after tragically losing his sister to suicide In the book he argues that these new ostensibly therapeutic technologies already pose significant risks to vulnerable people and they won't stop there These new breeds of AI systems are creating a psychiatric surveillance economy in which the emotions behavior and cognition of everyday people are subtly manipulated by psychologically savvy algorithms that have escaped the clinic Oberhaus also introduces readers to the concept of swipe psychology which is quickly establishing itself as the dominant mode of diagnosing and treating mental disorders It is not too late to change course but to do so means we must reckon with the nature of mental illness the limits of technology and what it means to be human
