*Navigating The Digital Shift: Implementation Strategies for Blended and Online Learning* John Bailey, Carri Schneider, Tom Vander Ark, 2013-10-09 Our nation's schools stand at an important inflection point in the history of education. Taken together, the implementation of common college and career standards, the shift to next generation assessments, the availability of affordable devices, and the growing number of high quality digital instructional tools create an unprecedented opportunity to fundamentally shift the education system to personalize learning around the individual needs of every student. Digital Learning Now (DLN), a national initiative under the Foundation for Excellence in Education (ExcellinEd) in association with Getting Smart, brings *Navigating the Digital Shift: Implementation Strategies for Blended and Online Learning* to readers interested in exploring the implementation challenges at the intersection of these shifts. Co-authored by John Bailey, Carri Schneider, and Tom Vander Ark, *Navigating the Digital Shift* offers updated versions of the eight papers originally released in the DLN Smart Series, including contributions from 11 additional co-authors representing leading organizations such as Public Impact, the International Association for K-12 Online Learning (iNACOL), and The Learning Accelerator. Topics include blended learning implementation, teaching conditions, and careers competency-based learning, student data, online learning myths, and student-based funding. Jeb Bush, Governor of Florida from 1999-2007 and Chairman of ExcellinEd, contends that the book provides policymakers and education leaders the tools they need to use digital learning as a catalyst for improved student achievement. AASA 2013 Superintendent of the Year, Dr. Mark Edwards, believes the collection provides meaningful practical and poignant advice as well as commentary regarding the move to college and career-ready standards associated with the shift to personal online learning and digital resources. Rhode Island's Commissioner of Elementary and Secondary Education, Deborah Gist, describes the book as an invaluable resource that will help educators reimagine what our schools can look like and what our students can accomplish.

***Navigating the Labyrinth*** Shirley Ann Smith, 2022-06-04 In spite of millions of dollars spent on professional development for teachers, the dream of providing every child with the great teacher they deserve always seems just out of reach. With each new education product and innovation promising to transform teaching and learning, the myth of a silver bullet to cure education's ills is perpetuated. But the silver bullet is already in the classroom: the teacher. Every teacher has the ability to transform their practice if he or she is willing to look inside themselves to make the changes necessary. By using methods described in *Navigating the Labyrinth: Teacher Empowerment Through Instructional Leadership*, educators can establish a metacognitive process for how they recognize what beliefs they have about how students learn, how they approach research so that it drives instructional decisions, and how they design and deliver instruction that ensures student learning at the highest level. This process is the foundation of effective pedagogy. Daily practice of these methods can establish a standard of professionalism that inoculates teachers against the ever-changing shiny things in the profession and enable them to become strong instructional leaders. *New England Journal of Education*
