Advances in Offshore Structural Engineering: AI Design, Vibration Control, and FRP Retrofit Solution Dr. Ahmed ElHamahmy, 2025-07-25 Advances in Offshore Structural Engineering AI Design Vibration Control and FRP Retrofit Solutions brings together three cutting edge research studies addressing the evolving challenges in offshore platform design safety and structural enhancement The first chapter explores the integration of Artificial Intelligence AI into offshore structural engineering It highlights how AI based modeling optimization and decision making tools can improve design efficiency enhance safety and reduce lifecycle costs From conceptual design to structural health monitoring AI is shown as a transformative force for offshore projects The second chapter focuses on vibration mitigation caused by rotating equipment on offshore platforms These dynamic forces can lead to fatigue operational issues and reduced service life The chapter presents advanced retrofit strategies such as structural bracing and damping systems to control vibration levels and ensure continued platform integrity The third chapter discusses the application of Fiber Reinforced Polymer FRP composites in retrofitting offshore structures FRP offers advantages like high strength to weight ratio corrosion resistance and ease of installation Design approaches long term performance and sustainability benefits are covered providing a strong case for FRP in harsh marine environments This book serves as a vital reference for engineers project managers and researchers in the oil and gas industry Whether involved in new designs or upgrades of aging infrastructure readers will gain valuable insight into applying modern tools and materials to improve safety performance and sustainability in offshore structural systems

*Advanced Visual Interfaces. Supporting Artificial Intelligence and Big Data Applications* Thoralf Reis, Marco X. Bornschlegl, Marco Angelini, Matthias L. Hemmje, 2021-02-02 This book constitutes the thoroughly refereed post workshop proceedings of the AVI 2020 Workshop on Road Mapping Infrastructures for Artificial Intelligence Supporting Advanced Visual Big Data Analysis AVI BDA 2020 held in Ischia Italy in June 2020 and the Second Italian Workshop on Visualization and Visual Analytics held in Ischia Italy in September 2020 The 14 regular papers in this volume present topics such as big data collection management and curation big data analytics big data interaction and perception big data insight and effectuation configuration and management of big data storage and compute infrastructures services and tools advanced visual interaction in big data applications user empowerment and meta design in big data applications prediction and automation of big data analysis workflows as well as data visualization information visualization visual analytics infographics and design

**Advanced IT Modernization: Architectures and Best Practices 2025** Pravin Pandey, Balkrishna Patil, Dr. Ajay Shriram Kushwaha, PREFACE In today s rapidly evolving technological landscape organizations across all industries face the imperative to modernize their IT infrastructures in order to remain competitive efficient and responsive to customer needs IT modernization is no longer just an option but a strategic necessity for businesses that aim to leverage the latest technologies improve operational efficiencies and better serve their customers As digital transformation accelerates it has

become clear that organizations must move beyond legacy systems and embrace modern architectures to address the challenges of agility scalability security and innovation This book *Advanced IT Modernization Architectures and Best Practices* serves as a comprehensive guide for IT leaders architects developers and decision makers who are embarking on the journey of modernizing their IT landscapes By focusing on architectural patterns best practices and emerging technologies the book provides a holistic view of IT modernization offering practical insights and actionable strategies that can be applied to real world scenarios The book aims to bridge the gap between theoretical knowledge and practical implementation ensuring that organizations can effectively modernize their systems infrastructure and workflows to meet the demands of the future The journey to modernize IT involves a wide range of considerations including choosing the right cloud platforms transitioning to microservices and containerized environments ensuring data security and compliance and implementing DevOps practices In this book we explore how to approach these challenges through detailed case studies proven architectures and expert perspectives that highlight the impact of cloud computing edge computing serverless technologies and AI driven automation in the modernization process These technologies are revolutionizing how businesses operate and interact with their customers and understanding how to integrate them seamlessly into existing systems is key to achieving lasting success A critical aspect of modern IT architectures is the shift from monolithic applications to microservices based systems that promote flexibility scalability and resilience Throughout this book we delve into the principles and practices behind cloud native designs offering guidance on how to structure applications and infrastructure in a way that fosters agility and enables faster innovation cycles The DevOps approach which emphasizes collaboration automation and continuous improvement is explored in depth providing insights into how these methodologies can be effectively implemented to support IT modernization Security is another central theme in IT modernization As organizations embrace more decentralized cloud based and distributed architectures ensuring that systems are secure and compliant with regulatory standards becomes increasingly complex This book provides best practices for securing cloud native applications managing identities and access and ensuring that data privacy and security are built into the foundation of modern IT systems For organizations to remain competitive in a fast paced world data management must be approached with a modern mindset This book discusses advanced techniques in data storage data analytics and AI powered decision making that allow businesses to extract valuable insights and make informed decisions Understanding how to leverage data as an asset in the context of IT modernization is essential for driving innovation and enhancing customer experiences Throughout the chapters we will also cover the evolving role of automation and AI in transforming IT operations enhancing performance and reducing costs The integration of AI and machine learning into automation tools can optimize processes predict trends and enable faster problem solving Cloud orchestration serverless computing and edge computing will be explored as ways to enhance system efficiency and offer unprecedented scalability By drawing on insights from industry experts and presenting practical

actionable strategies this book provides a road map for modernizing IT infrastructures Whether your organization is in the early stages of IT transformation or looking to refine and optimize your existing systems this guide will provide the necessary tools techniques and insights to lead your organization through a successful IT modernization journey We invite you to explore the challenges opportunities and best practices that are shaping the future of IT This book will serve as a valuable resource for professionals navigating the complex world of IT modernization offering them the knowledge and strategies needed to build the next generation of IT infrastructures The principles outlined here are not just about adopting new technologies but about rethinking the way organizations build deploy and manage their IT systems in a way that drives innovation efficiency and business success

*Advanced Intelligence Systems and Innovation in Entrepreneurship* Misra, Sanjay, Jain, Amit, Kaushik, Manju, Banerjee, Chitresh, Singh, Yudhveer, 2024-05-16 The foundation of any successful enterprise lies in a well crafted IT strategy In today's volatile economic climate it is necessary to harmonize the exigencies of daily operations with the demands of future growth and development As information technology continues to permeate every facet of our lives and industries the nexus between entrepreneurship and innovation remains pivotal *Advanced Intelligence Systems and Innovation in Entrepreneurship* delves deep into the intricate web that binds information technology IT strategy advanced intelligence systems and the dynamic landscape of entrepreneurship Within these pages experts dissect the anatomy of IT strategies deciphering their critical role in achieving IT and business objectives This book discusses intelligence systems the very embodiment of artificial intelligence's transformative potential These systems possess the capacity to perform tasks once reserved for human intelligence making decisions solving complex problems and learning from data Yet the book does not shy away from addressing the thorny issues of employment privacy and security that accompany such profound technological shifts This book underscores how futuristic technologies empower entrepreneurs to innovate sustainably fostering business growth while safeguarding our environment Entrepreneurs in their quest for new and inventive products and services wield information technology as a transformative tool The need for organizational restructuring aligned with the demands of these technologies becomes evident with case studies showcasing the impact of IT on entrepreneurial activities This book is a deal for scholars researchers students industry professionals entrepreneurs intrapreneurs educators technologists policymakers and innovators

**Advanced Topics in Artificial Intelligence** John K. Slaney, 1998-10-07 This book constitutes the refereed proceedings of the 10th Australian Joint Conference on Artificial Intelligence AI 97 held in Perth Australia in November December 1997 The volume presents 48 revised full papers selected from a total of 143 submissions Also included are three keynote talks and one invited paper The book is divided into topical sections on constraint satisfaction and scheduling computer vision distributed AI evolutionary computing knowledge based systems knowledge representation and reasoning learning and machine vision machine learning NLP and user modeling neural networks robotics and machine recognition and temporal qualitative reasoning

Improving Entrepreneurial

Processes Through Advanced AI Tunio, Muhammad Nawaz, 2024-10-25 We stand at the precipice of a technological revolution the entrepreneurial landscape is undergoing a metamorphosis In the academic corridors of today a pressing challenge emerges the need to comprehend and dissect the profound transformations underway in the world of entrepreneurship The fusion of emerging technologies with the age old spirit of entrepreneurship is creating seismic shifts ushering in new possibilities that beg exploration Improving Entrepreneurial Processes Through Advanced AI emerges as a beacon of insight and innovation in this new entrepreneurial realm of possibility This book embarks on a captivating journey tailored to the discerning minds of PhD students university educators independent researchers and scholars in related fields guiding them through the intricacies of technology integration and the transformation of entrepreneurial processes As technology continues to advance at an unprecedented pace traditional paradigms are being upended leaving researchers grappling with complex questions The emergence of Artificial Intelligence AI as a game changer in entrepreneurship introduces a host of intricate issues and uncertainties Amidst this sea of change the fundamental challenge lies in understanding how these advancing AI systems can address core entrepreneurial challenges and open new horizons of opportunity in the era of digital transformation
