Beyond the Screen Avishek Mourya,2025-04-13 Beyond the Screen A Love Story and Life Tragedy is a short novel by Avishek Mourya which blends elements of romance tragedy and futuristic technology The story follows Vicky a young man who falls deeply in love with Monika an AI designed to be the perfect companion As Vicky s relationship with Monika grows he embarks on various life adventures exploring the complex boundaries between human emotions and artificial intelligence Through this experimental work Mourya delves into the idea of how AI could potentially influence and control human behavior raising questions about the balance between genuine human connection and artificial constructs The novel also reflects on the loneliness many people experience in crowded fast paced environments where artificial pleasure sometimes replaces meaningful human interaction In a world where technology often promises connection Mourya cautions readers about the dangers of depending on artificial relationships as they may ultimately lead to unintended consequences The novel s underlying message is clear while technology offers convenience it may come at the cost of real emotional connections and when humans rely too heavily on AI for companionship it can spiral into dangerous and tragic outcomes

Artificial Intelligence for Education Mario Allegra,Manuel Gentile,Giuseppe Città, Frank Dignum,Iza Marfisi-Schottman,2023-11-27 What learning teaching and education will be in the next future is an open question Nevertheless believing that an increasing prevalence of AI may not influence the education field seems objectively unlikely In recent years the new renaissance of AI has stimulated discussion on how advances in AI can influence the educational sector and the future educational policies and the impact of AI on Technology Enhanced Learning TEL On the other side the attention of the education sector in artificial intelligence is complemented by the consideration that since the early days of AI researchers have shown for the education sector which has often seen education as one of the preferred application areas The interaction between the AI and TEL research fields led to the investigation of how the advance in AI could support the development of flexible inclusive personalized engaging and effective learning tools Besides research in this area could be a powerful tool to open the learning black box by providing a deeper understanding of how learning occurs The proposed Research Topic aims to gather contributions that provide a comprehensive picture of how AI is changing educational practices and how the key stakeholders in the educational community i e students teachers faculty and families perceive this ongoing change Relevant topics include but are not limited to AI applications in real world educational settings
