[Against Utopia - Technology won't save us](#) Victor de la Fuente, 2022-01-10

Against Utopia Technology Will Not Save Us is a book that unsettles because it dismantles an illusion We live surrounded by discourses that promise a perfect future built on algorithms metaverses and machines that make decisions for us The dominant narrative speaks of self driving cars that will end accidents of artificial

intelligences that will solve what humans cannot of cryptocurrencies that will free the economy of genetic advances that will perfect life and of a Singularity that will take us beyond our own intelligence But behind that vision lies a false promise the idea that technology on its own will be enough to save us The author a technophilosopher invites us to question this mirage The transformative power of each innovation is acknowledged but all of them carry the imprint of those who create them biases ethical dilemmas hidden interests and unforeseen consequences The metaverse with its promise of parallel worlds where anything is possible may end up eroding the way we relate to each other Autonomous vehicles heralded as the dawn of a new era in mobility raise unsettling questions about work decision making power and dependence on systems we barely understand Artificial intelligence far from being neutral reflects and amplifies our limitations and although cryptocurrencies and NFTs are presented as symbols of freedom and disruption their environmental impact volatility and speculative use reveal a darker side Even biogenetics capable of altering the most intimate aspects of life forces us to confront questions that verge on the sacred What does it mean to intervene in the code of the human Where do we draw the line And on the horizon looms the Singularity that promise of a definitive leap into the posthuman which inspires not so much hope as vertigo This book does not seek to deny the importance of innovation or to paint a bleak future for the mere sake of criticism Its aim is a critical exercise to look at technology without the veil of utopia to accept its power and at the same time its risks and limitations Because the real decision does not lie in the machines but in the way we choose to coexist with them Against Utopia is ultimately an invitation to think calmly in a time that seems to be moving far too fast A call not to confuse promises with certainties and to remember that the future is not designed solely with code but with responsibility reflection and human consciousness

as the sources of growth in an interconnected world are collaboration and network effects The winners will be those who open up and engage themselves in an ecosystem that transcends organizational boundaries and performs without sector borders because every actor contributes to the value constellation of the system The book provides practitioners and scholars with new insights into open and holistic business models where competition in future will be between ecosystems rather than at the company level It encourages leaders to expand their skills and think through the lens of the ecosystem theory while developing compelling strategies to serve the next generation clients
