Teaching Digital Natives Marc Prensky, 2010-03-29. Students today are growing up in a digital world. These digital natives learn in new and different ways, so educators need new approaches to make learning both real and relevant for today's students. Marc Prensky, who first coined the terms digital natives and digital immigrants, presents an intuitive yet highly innovative and field-tested partnership model that promotes 21st-century student learning through technology. Partnership pedagogy is a framework in which digitally literate students specialize in content finding, analysis and presentation via multiple media. Teachers specialize in guiding student learning, providing questions and context, designing instruction and assessing quality. Administrators support, organize and facilitate the process schoolwide. Technology becomes a tool that students use for learning essential skills and getting things done. With numerous strategies, how-to's, partnering tips and examples, *Teaching Digital Natives* is a visionary yet practical book for preparing students to live and work in today's globalized and digitalized world.
