The Globalization of the World's Economies James L. Newell,2025-11-10 The world is standing at a crossroads On the one hand economic globalization has brought unprecedented levels of prosperity It has lifted millions out of poverty it has massively enhanced education and skills development and it has increased the potential for the exercise of power from below for the

complexity of global supply chains renders them highly vulnerable to disruption by the protests of small groups of people in far flung places On the other hand neoliberal globalization has brought rising inequality the emergence in the developed world of the so called left behind refugee crises and increasingly problems related to health and the climate which the institutions of global governance have struggled to deal with thus undermining their authority and fuelling the growth of populist nationalism In order to get a sense of whether economic globalization will in future take a positive or a negative path it is essential to look at the past It is only through gaining an understanding of how we have come to be where we are that we will be better placed to see where we are going and most importantly to take the action needed to enable us to face the future with optimism rather than with fear This volume provides a comprehensive overview in historical perspective of the development and current state of globalization offering a wealth of information to students professionals and researchers alike
