**Decision Intelligence For Dummies** Pam Baker, 2022-02-08 Learn to use and not be used by data to make more insightful decisions The availability of data and various forms of AI unlock countless possibilities for business decision makers But what do you do when you feel pressured to cede your position in the decision making process altogether Decision Intelligence For Dummies pumps the brakes on the growing trend to take human beings out of the decision loop and walks you through the best way to make data informed but human driven decisions The book shows you how to achieve maximum flexibility by using every available resource and not just raw data to make the most insightful decisions possible In this timely book you ll learn to Make data a means to an end rather than an end in itself by expanding your decision making inquiries Find a new path to solid decisions that includes but isn t dominated by quantitative data Measure the results of your new framework to prove its effectiveness and efficiency and expand it to a whole team or company Perfect for business leaders in technology and finance Decision Intelligence For Dummies is ideal for anyone who recognizes that data is not the only powerful tool in your decision making toolbox This book shows you how to be guided and not ruled by the data

*The Adoption of Artificial Intelligence and Inertia in Higher Education* James Hutson, 2025-10-01 This research monograph explores the complex resistance to integrating Artificial Intelligence AI within higher education institutions Despite the significant potential of AI to enhance education faculty adoption remains inconsistent and is often met with skepticism This book investigates key factors contributing to this resistance such as leadership deficits funding barriers cultural inertia and faculty attitudes toward technological change Drawing on qualitative and quantitative empirical data case studies from U S and international institutions and theoretical analysis the book uncovers underlying concerns about job security and professional identity It points to actionable strategies for overcoming these barriers and will be relevant for scholars researchers advanced students and educators grappling with issues navigating technological integration in academia and with interests in the sociology of education educational technology and higher education administration

**Theorising Future Conflict** Mark Lacy, 2023-12-15 This book explores the changing tactics technologies and terrains of twenty first century war It argues that the world in 2049 is unlikely to look like the climate change artificial intelligence AI dystopia depicted in Blade Runner 2049 but nor will it be a world where conflict and war has been transformed by a civilising process that eradicates violence and conflict from the human condition 2049 is also the year that the US Department of Defense has suggested China will become a world shaping military power All states will be engaged in arms races across a variety of new tools and technologies from drones robotics AI and quantum computing that will transform politics economy society and war Drawing on thinkers such as Zygmunt Bauman and Paul Virilio the book suggests that future war will be shaped by three broad tendencies that include a broad range of tactics technologies and trends the impure the granular and the machinic Through discussions of cybersecurity urban war robotics AI climate change science fiction and new strategic concepts it

examines how these tendencies might evolve in the different geopolitical futures and types of war ahead of us The book provides a thought provoking and distinctive framework through which to think about the changing character of war It concludes that for all the novel and dangerous challenges ahead the futuristic possibilities of warfare will likely continue to be shaped by problems familiar to students of international relations and the history of war albeit problems that will play out in geopolitical and technological contexts that we have never encountered before This book will be of much interest to students of critical war studies security studies science and technology studies and International Relations in general
