With remote work, office not required, and telecommuting will bring many advantages to us and the environment. Let's work remotely for a better world. The pandemic has forced us into remote working with no clue how to do it without the means, without the preparation needed. The good thing is that it has given us the great opportunity to work from home, which might otherwise have taken years or even decades to arrive. Remote work is the new normal. There is going to be more and more remote employment. It's up to you to adapt to it and to take advantage of all the benefits it holds for your career. Carmen Corral has been remote working for more than eight years, both for companies and for herself. **Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates?** Huong Hoang Thien, 2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources

Recruiting grade 10 language English abstract What will happen if there aren't enough talents to fill the market in the future due to the demographical change? This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers, as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

Tips and Tricks To Working Online

Kristi Griffin, 2021-03-15 Working online or remotely has become a necessity for many this year. However, this is just the start of a larger trend. It is predicted that by 2027, the majority of the US workforce will be working remotely online. The office work lifestyle is familiar to most people: get dressed in your company clothes, commute to work, work in a room with a few other people, take scheduled breaks, et cetera. But remote workers at online jobs don't encounter most of those situations. They don't need to get dressed in company attire or commute to work. But it can be difficult for online workers to navigate working away from the office. Best practices are not as well defined because online work, at least in its current form, is still relatively new, so it can be difficult to know how you should act when working from home. There is no single formula for how to become an efficient online worker. Everyone will work at different times and have different tips on how to make the most of their time. Indeed, one of the major benefits of remote work is the flexibility it affords. performed each involving many thousands of separate data obtained under a variety of operating conditions Throughout most of these experiments the VF was used as the criterion of accuracy because it is inherently much more accurate than the VJ In some of the analyses comparisons were made of range or bearing differences between the reports turned in from two VJs on identical targets The latter is a measure of how much two VJs will disagree when they report on identical targets Author
