Customized Dimensions of Community Health, 4/E Dean F. Miller, 1998 Quality Assurance in Healthcare Service Delivery, Nursing and Personalized Medicine: Technologies and Processes Lazakidou, Athina, Daskalaki, Andriani, 2011-09-30

Quality of life is difficult to define and even more difficult to measure as such outcomes from nursing in continuing care are not easily articulated. Quality Assurance in Healthcare Service Delivery, Nursing and Personalized Medicine: Technologies and Processes offers a framework for measuring quality of service in the healthcare industry as it pertains to nursing with insight into how new technologies and the design of personalized medicine have improved quality of care and quality of life. Assessment and feedback are a vital part of developing and designing personalized medicine and this book details case studies and the latest research in the field of healthcare service delivery assessment. In addition to describing assessment methodology, the book is also a compendium of the latest research into new medical technologies.

Personalized Nutrition as Medical Therapy for High-Risk Diseases Nilanjana Maulik, 2020-04-18

Personalized nutrition involves the formulation of individualized nutritional recommendations to promote and maintain health based on an individual's genetic makeup and other unique intrinsic and extrinsic factors. Implementing personalized nutrition plans for individuals with certain diseases or who are in danger of developing health conditions could help control the onset and severity of symptoms. Personalized Nutrition as Medical Therapy for High Risk Diseases offers a practical guide for physicians seeking to provide tailored dietary recommendations to their patients with disease treatment modulation and prevention in mind. The book focuses on the biological mechanisms of specific diseases and provides evidence for how personalized nutrition positively impacts them. It explores conditions including cardiovascular diseases, hypertension, hypercholesterolemia, diabetes, obesity, Crohn's disease, as well as multiple pediatric renal and psychological disorders. Features include case studies that document how people respond differently towards food depending on their genetic structure and other factors. Discusses genome wide association studies (GWAS) to understand the interplay between genetic susceptibility and dietary interactions. Provides users information to effectively implement personalized nutrition into practice. Identifies possible challenges to the implementation of personalized nutritional interventions in a clinical setting. This book is for medical practitioners and will also appeal to researchers and students.
