# INTRODUCTION TO CRITICAL READING

### **What is Critical Reading?**

Being a critical reader does not require you to be critical about everything you read. There is no need to find fault and argue with the author on all things that you think are faulty, unconventional and questionable. What does critical reading mean, then?

In hindsight, critical reading is explained as the manner of engaging yourself in what you read by asking questions like, *"what does the author mean?"* *"what message is being conveyed in the text"* or *"what is the argument raised?"* The process of critical reading involves raising a reasoned, logical and balanced argument that analyzes and evaluated the text. Thus, being a critical reader means that you have achieved a higher level of comprehension, have stayed open-minded all throughout, and have continued to learn and embrace knowledge and wisdom outside your own standards and beliefs.

To critically read a text is to apply your discretion to what you are reading. You do not take everything you read at face value. You will be faced with the writer's insights and interpretations when reading texts for academic purposes. Expectedly, different writers have their own points of view and biases. For this reason, critically examining everything you read to check for intentional and unintentional omissions, grounds for arguments, and inconsistencies is of utmost importance.

You will be expected to understand and interpret different viewpoints in the academe, which are important in making your own judgments.

Reading critically means reflecting on:

- **Content of the text:** the reader should be able to interpret and explain the main points of the text on his or her own words
- **Descriptions in the text:** the reader should be able to create his or her own examples based from the described key points and be able to compare them with other texts of the same topic
- **Interpretation of the text:** the reader should be able to objectively analyze the text in parts and in whole
