Roenigk's Dermatologic Surgery Randall K. Roenigk, John Louis Ratz, Henry H. Roenigk, 2016-04-19 The cornerstone of any dermatologic library this Third Edition is greatly expanded and revised to provide more than 80 new and updated chapters on topics essential for the surgical dermatologist in day to day clinical practice With outstanding coverage of emerging and established surgical strategies cosmetic techniques and reconstruction method **Basic Cutaneous Surgery** Christopher B. format e.g. scuba diving and cutaneous decompression sickness Sport Related Skin Conditions A Guide for Clinicians informs dermatologists medical students and residents and the general sporting population about the types of dermatoses associated with various sports methods of identifying them preventing them and treating them For example providing information about the epidemiology of sun exposure in athletes in combination with sun protective guidelines tailored for those athletes e.g. UV and waterproof sun protection for sailors could help to improve patient care Additionally highlighting the current state of dermatological knowledge relevant to sports can help guide research scientists in finding areas to expand the knowledge base of dermatology Additionally by organizing chapters related to groups of sports this will allow for comparison between different sports in terms of the epidemiology of skin conditions and to stimulate future research into comprehensive prevention and management guidelines for overlapping dermatological conditions in related sports
