Cyberactivism Online Activism In Theory And Practice:

Cyberactivism Martha McCaughey,Michael D. Ayers,2003 The Internet has played a central role in some of the most successful instances of contemporary political activism This book examines the growing importance of this aspect of activism including the politically motivated sabotage of commercial websites *Cybersounds* Michael D. Ayers,2006 Textbook

Internet Fictions Ingrid Hotz-Davies,Anton Kirchhofer,Sirpa Leppänen,2008-12-18 The Internet is nothing less than a medium for the indiscriminate and global dissemination of information if we take information in its cybernetic sense as bits of data any data As such it is also a massive amorphous rhizomic collection of substantiated facts guesswork fantasy madness debate criminal energy big business stupidity brilliance all in all a seemingly limitless multiplication of voices all clamouring to be heard It is a medium which proliferates stories narratives fictions in ways which are both new and familiar It is as a generator of fictions that the Internet seems to be just waiting to be explored by the disciplines of literary cultural and linguistic studies Fan fiction slash and straight scam baiting fan sites wild or rogue interpretive universes gossip theories musings opinions As a singularly unstructured and hence as yet uncanonizable body of texts the stories told on the Internet have a distinct element of grass roots fictionalization and so offer an unprecedented opportunity to access hear and investigate the stories and fantasies woven by non professional writers alongside their more formally recognized colleagues As a medium which is beginning to investigate itself by means of various meta debates within the vast community of Internet fictionalizers it is also a location where emergent phenomena may be debated in their process of being generated This collection seeks to explore this for the most part uncharted territory in creative innovative theory savvy ways using the manifold fictions the Internet generates It brings together a wide variety of expertise from the fields of linguistic literary media and cultural studies All contributors bring to the collection their individual voices and approaches which speak from various positions of involvedness or critique to provide searching and passionate discussions of the issues involved in Internet Fictions **The Networked Young Citizen** Brian D. Loader,Ariadne Vromen,Michael Xenos,2014-06-05 The future engagement of young citizens from a wide range of socio economic ethnic and cultural backgrounds in democratic politics remains a crucial concern for academics policy makers civics teachers and youth workers around the world At a time when the negative relationship between socio economic inequality and levels of political participation is compounded by high youth unemployment or precarious employment in many countries it is not surprising that new social media communications may be seen as a means to re engage young citizens This edited collection explores the influence of social media such as YouTube Facebook and Twitter upon the participatory culture of young citizens This collection comprising contributions from a number of leading international scholars in this field examines such themes as the possible effects of social media use upon patterns of political socialization the potential of social media to ameliorate young people s political inequality the role of social media communications for enhancing the civic education curriculum and evidence for social media manifesting new

forms of political engagement and participation by young citizens These issues are considered from a number of theoretical and methodological approaches but all attempt to move beyond simplistic notions of young people as an undifferentiated category of the internet generation   Community Organizing and Community Building for Health Meredith Minkler,2005   **User-Centric Technology Design for Nonprofit and Civic Engagements** Saqib Saeed,2014-04-26 Due to the increased global political importance of the nonprofit sector its technological support and organizational characteristics have become important fields of research In order to conduct effective work nonprofits need to communicate and coordinate effectively However such settings are generally characterized by a lack of resources an absence of formal hierarchical structures and differences in languages and culture among the activists Modern technologies could help nonprofit networks in improving their working In order to design appropriate technological support for such settings it is important to understand their work practices which widely differ from traditional business organizations This book aims to strengthen the body of knowledge by providing user studies and concepts related to user centered technology design process for nonprofit settings The examination of ethnographic studies and user centered evaluation of IT artifacts in practice will further the understanding of design requirements of these systems This book includes chapters from leading scholars and practitioners on the technology design process examining human centered factors The chapters will focus on developed and developing countries as they both have unique issues in technology design The book will be useful or of interest to academics from a range of fields including information systems human computer interaction computer supported cooperative work and organizational science as well as for government officials and governmental organizations   **Cyberactivism on the Participatory Web** Martha McCaughey,2014-04-16 Cyberactivism already has a rich history but over the past decade the participatory web with its de centralized information media sharing portability storage capacity and user generated content has reshaped political and social change Cyberactivism on the Participatory Web examines the impact of these new technologies on political organizing and protest across the political spectrum from the Arab Spring to artists to far right groups Linking new information and communication technologies to possibilities for solidarity and action as well as surveillance and control in a context of global capital flow war and environmental crisis the contributors to this volume provide nuanced analyses of the dramatic transformations in media citizenship and social movements taking place today   Civic Engagement and Social Media J. Uldam,A. Vestergaard,2015-05-19 The Occupy movement and the Arab Spring have brought global attention to the potential of social media for empowering otherwise marginalized groups This book addresses questions like what happens after the moment of protest and global visibility and whether social media can also help sustain civic engagement beyond protest   **International Handbook of Internet Research** Jeremy Hunsinger,Lisbeth Klastrup,Matthew Allen,2010-06-17 Internet research spans many disciplines From the computer or information s ences through engineering and to social sciences humanities and the arts almost all of our disciplines have

made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop so ware and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a eld for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this eld research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the int net as a eld for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give de nition to the eld and provide us with a particular topography that enables research and investigation *CSA Guide to Cloud Computing* Raj Samani,Brian Honan,Jim Reavis,2014-09-22 CSA Guide to Cloud Computing brings you the most current and comprehensive understanding of cloud security issues and deployment techniques from industry thought leaders at the Cloud Security Alliance CSA For many years the CSA has been at the forefront of research and analysis into the most pressing security and privacy related issues associated with cloud computing CSA Guide to Cloud Computing provides you with a one stop source for industry leading content as well as a roadmap into the future considerations that the cloud presents The authors of CSA Guide to Cloud Computing provide a wealth of industry expertise you won t find anywhere else Author Raj Samani is the Chief Technical Officer for McAfee EMEA author Jim Reavis is the Executive Director of CSA and author Brian Honan is recognized as an industry leader in the ISO27001 standard They will walk you through everything you need to understand to implement a secure cloud computing structure for your enterprise or organization Your one stop source for comprehensive understanding of cloud security from the foremost thought leaders in the industry Insight into the most current research on cloud privacy and security compiling information from CSA s global membership Analysis of future security and privacy issues that will impact any enterprise that uses cloud computing **Javnost** ,2008 Journal of Public Policy ,2005 Asian Cyberactivism Steven Gan,James Gomez,Uwe Johannen,2004 Asian Cyberactivism Freedom of Expression and Media Censorship aims to record political activism on the Internet and take stock of some of the successes and failures of cyberactivists as they try to beat the various censorship regimes in Asia The sections of this 664 page book comprise of Political Frameworks New Technology Regulations and Control One Party States Alternative Media Civil Society Diaspora Communities and Political Parties The book s 18 chapters provide an overview of current trends in democracy related new media research to country specific case studies The common thread running through the book is the organizing of civil

society groups at the grassroots level and how they are influencing certain segments of their respective countries and even challenging state control and the monopoly of mainstream media Asian Cyberactivism strives to examine political organising online in Asia even as the technology and the rules change Activists provide their perspectives on how new media relates to democracy and showcase examples that could be emulated to further the cause of democracy Expressions of free speech have blossomed with the advent of new communications technologies like the Internet but with the Internet itself becoming a target for censorship regulation and control it remains to be seen if cyberactivists in Asia will be able to overcome or bypass them   **Global Activism, Global Media** Wilma De Jong,Martin Shaw,Neil Stammers,2005 The first four films from the spy franchise starring Tom Cruise as a special agent In Mission Impossible 1996 Ethan Hunt Cruise an IMF Impossible Mission Force agent is hunted by his own organisation after a mission in Prague goes wrong Going to ground Hunt enlists the help of two discredited agents to track down the real villain of the piece a quest that takes him to the heart of CIA operations In Mission Impossible 2 2000 Impossible Missions Force s Ethan Hunt is charged with tracking down renegade fellow agent Sean Ambrose Dougray Scott who has stolen the only known supply of Bellophron the antidote to man made virus Chimera Ethan enlists the help of Ambrose s ex girlfriend Nyah Nordoff Hall Thandie Newton and although the pair have fallen in love Nyah agrees to return to Ambrose in order to gain information However Ambrose now intends to trigger off an epidemic of Chimera in order to sell Bellophron to the highest bidder and when he becomes suspicious of Nyah decides to use her as a guinea pig In Mission Impossible 3 2006 Hunt confronts the toughest villain he s ever faced Owen Davian Philip Seymour Hoffman an international weapons and information provider with no remorse and no conscience Hunt assembles his team his old friend Luther Strickell Ving Rhames transportation expert Declan Jonathan Rhys Meyers background operative Zhen Maggie Q and fresh recruit Lindsey Keri Russell to travel the globe pursuing Davian and rescue Hunt s love Julia Michelle Monaghan In Mission Impossible Ghost Protocol 2011 when the Kremlin is bombed by terrorists the IMF is implicated and all its team members instantaneously disavowed by the United States government Hunt and his new team must go rogue to clear the IMF s name but are warned that if any one of them is captured during their mission they will be charged as terrorists plotting to incite global nuclear war Hunt seeks the help of an enigmatic former IMF agent Brandt Jeremy Renner and is surprised to learn how much the shadowy figure knows about his past   *The Myth of Digital Democracy* Matthew Scott Hindman,2009 Matthew Hindman reveals here that contrary to popular belief the Internet has done little to broaden political discourse in the United States but rather that it empowers a small set of elites some new but most familiar

Radical Democracy and the Internet Lincoln Dahlberg,Eugenia Siapera,2007-05-22 In this systematic and mutual interrogation of radical democratic theory and Internet practice contributors examine a range of democratic theories in relation to online communication and explore how such communication may advance democracy beyond what is conceptualized and practised within present liberal capitalist political contexts   Journal of Information Science ,2005

Queer Online David J. Phillips,2007 Original Scholarly Monograph   **Digital Youth** Jonathan Alexander,2006 Argues that the youth use the Web to experiment with and deploy a number of rhetorical strategies that tell about their vision for the communications technologies and the literacy practices they use to engage that technology This book aims to offer a portrait of the future use of communications technologies particularly the Web   *Directory* Modern Language Association of America,2003
