Cyberstrategy Business Strategy For Extranets Intranets And The Internet:

Cyberstrategy Pauline Bickerton, Matthew Bickerton, Kate Simpson-Holley, 1998 This book follows Bickerton's successful Cybermarketing which advised marketing managers on how to create a site and start using the net to sell products and services. The new book offers advice at the next level up to senior executives/directors about using nets as part of a corporate communications and marketing strategy. This book delivers a no-nonsense and pragmatic view on the use of these technologies within an organization as both a private and public communication channel. It is designed to show senior executives how to use the technology in a range of activities from straight selling through to sophisticated corporate communications. To demonstrate how to integrate nets with broader marketing strategy, the key features of this book are: A powerful model for explaining the strategic uses and strengths of the Internet, Extranets and Intranets. The authors have created a matrix showing the features of each and the potential linkages between them to demonstrate how to use them individually or in a mix. Clear guidance on how to bridge the gap between IT and Marketing to exploit the technology rather than getting bogged down in it. Copious exercises and real-life examples accompanied by worksheets in each chapter so that real campaigns can be put together from the book. Strategic focus for senior managers. Bridging the IT/marketing divide. Shows how to apply the latest ideas. Seeking Success in E-Business Kim Viborg Andersen, Steve Elliot, Paula M.C.
