   Technocrime Stéphane Leman-Langlois,2013-05-13 This book is concerned with the concept of technocrime The term encompasses crimes committed on or with computers the standard definition of cybercrime but it goes well beyond this to convey the idea that technology enables an entirely new way of committing combating and thinking about criminality criminals police courts victims and citizens Technology offers for example not only new ways of combating crime but also new ways to look for unveil and label crimes and new ways to know watch prosecute and punish criminals Technocrime differs from books concerned more narrowly with cybercrime in taking an approach and understanding of the scope of technology s impact on crime and crime control It uncovers mechanisms by which behaviours become crimes or cease to be called crimes It identifies a number of corporate government and individual actors who are instrumental in this construction And it looks at the beneficiaries of increased surveillance control and protection as well as the targets of it Chapters in the book cover specific technologies e g the use of CCTV in various settings computers hackers and security experts photo radar but have a wider objective to provide a comparative perspective and some broader theoretical foundations for thinking about crime and technology than have existed hitherto This is a pioneering book which advances our understanding of the relationship between crime and technology drawing upon the disciplines of criminology political science sociology psychology anthropology surveillance studies and cultural studies   **Towards Cyberpsychology** Giuseppe Riva (Ph.D.),Carlo Galimberti,2001   *Teach Yourself 101 Key Ideas Information Technology* Stephen Gorard,Neil Selwyn,2002-04-23 This text aims to provide an overview of issues surrounding the development use and consequences of information technology in

modern society Topics covered include key concepts hardware software uses of IT and the effects of IT on society   Javnost ,2006   *Handbook on Cyber Hate* Anne Wagner,Sarah Marusek,2024-08-06 Cyberhate is defined as racist discriminatory negationist and violent statements made on social network platforms text platforms comment pages and more The Handbook on Cyber Hate the Modern Cyber Evil includes twenty seven chapters from scholars representing over fifteen countries from the Global North and the Global South demonstrating a range of multi faceted perspectives While providing such a focus these papers will also operate with a constantly evolving conceptualization of contemporary societies and their modern cyber evil Indeed modern cyber evil is a global concern and is primarily based on human minds and activities and on deviant uses of modern technologies which may differ ideologically historically and culturally on the global map of modern legal systems This plurality of perspectives which poses a challenge to our future is a strength of this handbook that offers a variety of foundations legal perspectives and popular developments in an effort to suggest measures to combat this modern cyber evil infecting communications around the world Editors Anne Wagner and Sarah Marusek offer a unique collection of chapters involving the theoretical foundations legal perspectives and societal perspectives from popular culture of modern cyber evil in order to address and combat racism on the basis of alleged race skin color nationality descent and national or ethnic origin etc discrimination xenophobia on the basis of sex gender sexual orientation religious or philosophical beliefs health status physical characteristics etc hatred violence e predation and e victimization Advance Praise for Handbook on Cyber Hate The Modern Cyber Evil In Handbook on Cyber Hate The Modern Cyber Evil editors Anne Wagner and Sarah Marusek have masterfully created a much needed resource for understanding the complex and ever changing landscape of online hate and cyberbullying This comprehensive handbook delves deep into the murky waters of cyberevil offering insightful semiotic and transdisciplinary perspectives from a wide range of international scholars Each chapter deftly navigates the theoretical legal and societal dimensions of cyberhate shedding light on the complex interplay between technology law and culture The book s exploration of cyber hate is not just academic but a call to action It encourages readers denizens of the digital semiosphere to recognize and combat the insidious nature of online hate equipping them with knowledge and strategies for creating a safer digital world Covering topics from the study of benign exhibitionism the boundaries between speech and action in cyberhate legal intricacies of that speech trolling in social media and hegemonic masculinity to the cinematic portrayal of cyberbullying and the malicious use of memes this handbook is a beacon of hope and guidelines in our increasingly digital society What sets this handbook apart is its holistic approach It not only identifies problems but in many cases inspires solutions fostering a culture of responsible digital citizenship and empathy This is not just a book but a road map for creating a more inclusive and compassionate online community As we face the challenges of the digital age Handbook on Cyber Hate The Modern Cyber Evil is an indispensable handbook for researchers educators policy makers and all who seek to understand and combat the complexities of cyber hate This is a must read for shaping a more respectful and empathetic digital world Kristian Bankov

Professor of Semiotics New Bulgarian University In the present time of great confusion caused by the blurring of the lines of distinction between the real and virtual worlds between artificial and human forms of intelligence and even between good and bad technologies representative for expressions of love and hate the Handbook on Cyber Hate The Modern Cyber Evil brings an urgently needed comprehensive and transdisciplinary reflection on the evil sides of human activities in cyberspace Rostam J Neuwirth Professor of Law and Head of Department of Global Legal Studies Faculty of Law University of Macau This is a time critical volume of significance which covers a range of aspects relating to one of the most pernicious social challenges of modern times Any scholar working in the field needs a copy at hand essential reading material in an ever evolving discussion The range of perspectives and discussions offers a unique critical mass from which to evaluate the progress the enduring challenge and the scope for hope in addressing cyberhate Kim Barker Professor of Law Lincoln Law School　　**Death of the Church** Mike Regele,Mark Schulz,1995 Our culture is changing at a dizzying rate But the church seems to be left behind caught in subcultural backwaters that have little or no impact on mainstream society Based on the quantitative research of his group Percept Regele analyzes the forces in our culture and discusses how the church can fulfill its mission in the face of them　　Political Communication Philip M. Seib,2008　　*The Coming American Renaissance* Michael Moynihan,1996 In this work that will be widely debated U S Commerce Department authority Moynihan challenges the gloom and doom forecasters and shows why America will prevail in the 21st century with practical advice for every consumer from job hunters to home seekers　　*Thailand Telecommunications Directory, 1994* ,1993　　**Cyber Space** David Jefferis,1999 The digital story from the early days of computers to virtual reality and the world wide web is told in this exciting new book The life saving applications of computer simulation in flight battle and hazardous environments are explored as are computer arts in the fields of film graphic arts and games and entertainment　　**Insight Turkey / Summer 2022: Embracing Emerging Technologies** ,2022-11-01 Historically speaking technology has been one of the main determinants in international politics due to its impact on economic development and warfare However lately its preponderancy is becoming more inclusive considering that technologies such as artificial intelligence AI Internet of Things IoT big data blockchain 3D printing etc are evolving faster than ever From the Ukraine Russia war and the energy crisis to the global economic and social crisis to the deepening great powers rivalry all point to the importance of emerging technologies Specifically technology has become a key asset in the framework of international relations and the so called technopolitics the entanglement of technology with politics is impacting global affairs at the international and national levels Primarily emerging technologies have a transformative impact on the actors of the international order While the existing Western led international system had at its core the Westphalian principles with states as the main actors it is expected that in the close future this will be challenged by the tech giants who are now driving the technological revolution Considering the state s dependency on tech giants for the development of emerging technologies and the impact of these technologies on

economic development and national security it is understandable that the power of tech giants will increase So when faced with an international crisis states and international regional institutions will not be the only actors sitting at the table Furthermore the structure and hierarchy of the international system will be shaped by the evolution of technology Seen both from the economic and military perspectives the early adoption of these emerging technologies will provide a strategic advantage for the early users which undoubtedly is directly reflected in the power of states and their position within the existing order While some states become more successful than others in the production development and adoption of these technologies the hierarchy between states will change as well leading to a new global order The ongoing great power competition especially between the U S and China can be understood within this framework as it would not be wrong to assert that technological competition is the main ground of rivalry Both states consider technological development as the main asset to achieve their national goal for the U S it is to maintain its leadership in the existing system while China aims to leapfrog the U S and become a superpower As technology shapes and changes the relations among states so will other aspects of politics be affected such as diplomacy and warfare While the creation and advancement of the Metaverse are considered to revolutionize diplomacy the application of artificial intelligence in the military is indeed revolutionizing warfare As mentioned previously the proper and quick adoption of these emerging technologies in the political agenda is directly related to the reflection of a state s power in the international system In this context lagging in this technological revolution would be detrimental to a state T rkiye is one of the few states that is not only aware of the benefits of the early adoption of the new technologies but has also taken important steps in this regard Becoming official in 2019 T rkiye has announced its policies called National Technology Initiative and Digital T rkiye Both policies are impacting every sector of life in T rkiye i e industry health education defense etc and aim to transform the state s technological future by using its local capacities to produce high tech products As a result T rkiye will gain more economic and technological independence which will place T rkiye among the most technologically developed states in the future To illustrate this point T rkiye s defense industry has been revolutionized within the concept of the National Technology Initiative Henceforth today T rkiye has become one of the leading global actors in terms of the production and use of Unmanned Aerial Vehicles UAVs The impact of the emerging technologies in every aspect of human life is unequivocal however this special issue of Insight Turkey will focus mainly on how technopolitics is shaping the states policies with a special focus on T rkiye Within this context this issue includes 8 research papers and 5 commentaries all of which offer a novel perspective on the subjects they address Our commentary section features two on topic and three off topic pieces In his inquisitive commentary Richard A Bitzinger seeks to illustrate how the technologies incorporated into the upcoming 4th industrial revolution and AI in particular promise to represent a radical paradigm shift in the form and conduct of combat in the future Bitzinger s analysis makes it clear that these technologies will probably also have a significant influence on international rivalries between large powers aspirational

regional actors or governments who view technology as a vital force multiplier This analysis we believe will shed light on how new and emerging critical technologies are challenging the traditional warfighting paradigm as well as how militaries can access and leverage these innovations In our second on topic commentary Bruno Ma es challenges readers to consider climate change and its impact on global politics bravely and originally According to Ma es we cannot refer to climate change as a byproduct of the Anthropocene the world that humans have created Because of our limited potential to influence natural processes and consequent inability to control the unintended effects of our activities and decisions climate change is still fundamentally a natural phenomenon that humans have only just begun to cause Intriguingly Ma es contends that joining the Anthropocene for the first time as opposed to leaving it is the solution to the climate problem Our research articles cover a wide range of topics that are all important to the relationship between technological advancements and global politics In the first paper of the line Erman Ak ll launches a stimulating conversation about the future success of the Metaverse which depends according to the author on the creation of universes that are founded on global organizations or regional integrations rather than monopolization Instead of offering quick fixes Ak ll poses some tough questions For instance he raises our attention to unanswered questions regarding state sovereignty in general and the issue of how a state can exercise its sovereign authority in the Metaverse The author also emphasizes the vast prospects that the metaverse offers for nations to engage in cultural diplomacy In line with this the author describes efforts to build the Turkoverse a metaverse based on the Turkic world which would allow for unrestricted movement of people and goods inside the Turkic World while eliminating the physical gap between member states capitals In the upcoming article Javadbay Khalilzade describes how UAVs or combat drones have proliferated and how this has changed and shaped modern warfare The article looks at T rkiye as a manufacturer and active user of UAVs in wars in Africa and the Middle East The case study in the article also looks at Azerbaijan a third tier small state that depends on drone exports but is ambitious enough to use drones to make its presence felt in the region and liberate its lands The article makes the case that drones give militaries a tactical edge improve combat precision and broaden the arsenals available for fighting insurgencies yet drone proliferation also makes states more prone to conflict and compromises regional peace and security In the following research article Nezir Akye ilmen investigates the documents policies strategies measures and organizational structures of T rkiye s national cybersecurity strategy Is T rkiye s cybersecurity strategy properly designed to deal with the new security environment in the hyper anarchic world of cyberspace Following a thorough examination of T rkiye s cybersecurity strengths and weaknesses Akye ilmen responds prudently to this question T rkiye s technical performance is relatively weaker than its legal performance necessitating the development and implementation of a centralized cybersecurity strategy by a large and powerful institution Following Akye ilmen s insightful criticism Ali Burak Dar c l evaluates the Turkish National Intelligence Organization s Mill stihbarat Te kilat M T increasing operational capacity in the context of high technology products Dar c l concludes that M T s domestic

technology capabilities have made a significant contribution to T rkiye s counter terrorism activities achievement of regional foreign policy goals deployment of hard power in the field when necessary and efforts to become a proactive actor in the region Then Cenay Babao lu questions how the pandemic process has affected the increasing digitalization of public administrations with the rising use of technology in administrative functions as our focus shifts from security to public administration The author recalls that with support from both supply and demand the COVID 19 pandemic has been a driving force in government digitalization As the author explains following this trend and particularly with the transition to the Presidential Government System in 2018 the Presidency Digital Transformation Office which was established as the coordinator of digital transformation played an important role in T rkiye during the pandemic In what follows Narmina Mamishova examines T rkiye s vaccine diplomacy and its role in the country s efforts to maintain and expand its stakes in the global power configuration Highlighting how since the outbreak of the coronavirus pandemic public health has emerged as a key issue of discourse among states the authors show how T rkiye has managed to consolidate its strength in the international arena through both skillful balancing in terms of vaccine deals and well packaged humanitarian efforts The author argues that T rkiye has been successful in achieving this through persevering in the pursuit of a proactive comprehensive policy in which the sole standard for a move s legitimacy would be its alignment with the nation s national interests As we shine a spotlight on the economy in the post COVID 19 era Bilal Bagis focuses on the ways a new instrument central bank digital currency is projected to improve contemporary payment systems strengthen the effectiveness of the monetary policy and assure financial stability in the new period Following the 2008 Crisis and the 2020 Pandemic as well as innovations such as the all new cryptocurrencies and stable coins many central banks have expressed an interest in introducing their own digital money according to the paper Anticipating that physical currencies will inevitably be digitalized one way or the other the author poses a valid question why not embrace the trend and the new technology regulate and then make sure digital currencies satisfy all the functions of a regular conventional physical currency In a similar spirit in our final research paper Mehmet R da T r makes the prediction that AI will soon overtake humans as the primary decision makers in the energy sector For the author making the energy system more flexible and establishing a smart supply system with domestic and renewable energy resources at its core is necessary to prevent any bottlenecks in satisfying the energy demand of all countries including T rkiye From our off topic pieces Mahmut zer the Minister of National Education of T rkiye elaborates on the process of universalization from elementary to higher education in T rkiye describing how it gave priority to areas with comparatively lower rates of schooling by making large investments and carrying out large initiatives zer explains how because of recent changes the nation has undergone in the education sector T rkiye s educational system has been able to overcome the difficulties it had inherited from the past and has strengthened its capacity to become even more effective and equitable for all pupils In the following off topic commentary Nur in Ate o lu G ney focused on the most recent

achievement of T rkiye in bringing the warring sides of Ukraine and Russia to an agreement on the transfer of grain from Ukraine s ports G ney contends that this is a result of Ankara s long standing sensible approach of maintaining communication with both capitals despite hostilities to maintain access to both She concludes that the prospect of growing food scarcity conditions and subsequently the projected worldwide crisis appears to have been avoided for the time being thanks to T rkiye s effective mediating performance which will also be conducive to alleviating the negative conditions caused by the likelihood of food shortages in locations like Egypt Lebanon and elsewhere The political and strategic repercussions of Russia s war against Ukraine are examined by Sabrina P Ramet and Aleksander Zdravkovski in the final commentary The authors claim that because of the war in Ukraine Serbia may now see an opportunity to conclude some unfinished business Serbia has recently been buying weapons from China and Russia for this purpose and it has also tried to buy 12 fighter jets from France The recent armaments buildup by Serbia is unlikely to be for defensive purposes as the writers draw our attention to the fact that none of Serbia s neighbors or any other states for that matter pose a threat to Serbia All things considered we endeavored to explore as many facets as possible of the interplay between new technology advancements and Turkish technopolitics in the Summer 2022 issue of Insight Turkey We hope and believe that the insightful and stimulating debates raised on the issue will be helpful to our readers **India's Cybersecurity Policy** Thangjam K. Singh,2024-06-07 This book examines India s public policies on cybersecurity and their evolution over the past few decades It shows how threats and vulnerabilities in the domain have forced nation states to introduce new policies to protect digital ecosystems It charts the process of securitisation of cyberspace by the international system from the end of the 20th century to the present day It also explores how the domain has become of strategic interest for many states and the international bodies which eventually developed norms and policies to secure the domain Consequently the book discusses the evolution of cybersecurity policy at global level by great powers middle powers and states of concern and compares them with the Indian context It also highlights the requirement of introducing improving new cybersecurity guidelines to efficiently deal with emerging technologies such as 5G Artificial Intelligence AI Big Data BD Blockchain Internet of Things IoT and cryptocurrency The book will be of great interest to scholars and researchers of cybersecurity public policy politics and South Asian studies **Future War** Christopher Coker,2015-11-12 Will tomorrow s wars be dominated by autonomous drones land robots and warriors wired into a cybernetic network which can read their thoughts Will war be fought with greater or lesser humanity Will it be played out in cyberspace and further afield in Low Earth Orbit Or will it be fought more intensely still in the sprawling cities of the developing world the grim black holes of social exclusion on our increasingly unequal planet Will the Great Powers reinvent conflict between themselves or is war destined to become much smaller both in terms of its actors and the beliefs for which they will be willing to kill In this illuminating new book Christopher Coker takes us on an incredible journey into the future of warfare Focusing on contemporary trends that are changing the nature

and dynamics of armed conflict he shows how conflict will continue to evolve in ways that are unlikely to render our century any less bloody than the last With insights from philosophy cutting edge scientific research and popular culture Future War is a compelling and thought provoking meditation on the shape of war to come   Intelligent Environments P. Droege,1997-03-20 The environment as modified and created by people is largely about the use of information its generation and exchange How do recent innovations in the technologies of information management and communication affect our use of space and place and the way we perceive and think about our surroundings This volume provides an international exploratory forum for the complex phenomenon of new information and communication technology as it permeates and transforms our physical world and our relation to it the architectural definition of our surrounding geographical space urban form and immediate habitats This book is a reader an attempt at registering disciplinary changes in context at tracing subtexts for which most mainstream disciplines have no established language The project is to give voice to an emerging meta discipline that has its logic across the specializations A wide range of professionals and academics report findings views and ideas Together they describe the architecture of a postmodern paradigm how swiftly mutating the proliferating technology applications have begun to interact with the construction and reading of physical space in architecture economics geography history planning social sciences transport visual art but also in the newer domains that have joined this spectrum through the very nature of their impacts information technology and telecommunications The space navigated in this volume is vast both in physical terms and in its virtual and analogous form It ranges from the space that immediately encompasses or is simulated to encompass the human body as in buildings and virtual tectonics to that of towns and regions We stay clear of molecular scale space and of dimensions that are larger than earth   Hastings Communications and Entertainment Law Journal (Comm/Ent) ,1996   *Maryland journal of international law and trade* ,1998
