Cytochrome Systems S. Papa, B. Chance, L. Ernster, 2012-12-06 This volume is based on the proceedings of an International Symposium on Cytochrome Systems Molecular Biology and Bioenergetics that was held at Selva di Fasano near Bari Italy between April 7 and 11 1987 It contains papers covering the subjects discussed at the Symposium contributed both by participants of the meeting and by some invited speakers who were not able to attend The aim of the Symposium was to bring together experts in various research strategies currently being applied to the study of cytochrome systems including molecular genetics protein chemistry enzymology of electron transfer and protonmotive activity in energy transducing biological membranes Because of the high degree of complexity of cytochrome systems and the increasing sophistication in recent years of the different experimental approaches there has been a growing specialization sometimes even a tendency to over specialization among scientists working in this field This in itself seemed to justify a meeting where representatives of various disciplines could exchange their results and discuss their conclusions In addition and perhaps even more importantly it was felt that meetings of this kind provide an opportunity for a cross fertilization of approaches and ideas among representatives of various fields of science The present meeting proved to be an ample illustration of the success of such an interaction
