Green Roof Systems Susan Weiler, Katrin Scholz-Barth, 2009-05-04 Green Roof Systems goes beyond the fashionable green roof movement and provides solid information on building accessible space often as important public space over structure. It offers brief coverage of the entire process including planning and collaboration and focuses on the technical aspects of these roof systems, their components and their applications. **Nature-Based Solutions to Climate Change Adaptation in Urban Areas** Nadja Kabisch, Horst Korn, Jutta Stadler, Aletta Bonn, 2017-09-01 This open access book brings together research findings and experiences from science, policy and practice to highlight and debate the importance of nature-based solutions to climate change adaptation in urban areas. Emphasis is given to the potential of nature-based approaches to create multiple benefits for society. The expert contributions present recommendations for creating synergies between ongoing policy processes, scientific programmes and practical implementation of climate change and nature conservation measures in global urban areas. In addition, this book presents a unique exchange of experiences and ideas with a focus on cooperation between researchers and those involved in putting ideas into practice. Topics include aims and standards for ecological cities, the integration of ecological, economic, social and cultural aspects, land use as a controlling factor, ecologically responsible mobility and the integration of nature and landscape into urban development. *Urban Services to Ecosystems* Chiara Catalano, Maria Beatrice Andreucci, Riccardo Guarino, Francesca Bretzel, Manfredi Leone, Salvatore Pasta, 2021-09-15 The aim of this book is to bring together multidisciplinary research in the field of green infrastructure design, construction and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature-based solutions and sustainable urban development. The green infrastructure and its ecosystem services indeed are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man-made environment like cities from heterotrophic to autotrophic ecosystems. From landscape ecology to urban and building design like bricks of a wall from the small scale to the bigger landscape scale via ecological networks and corridors, we should start answering these questions: what are the services that we are offering to Nature? What are we improving? How to implement our actions?
