The Oxford History of Poetry in English Helen Cooper, Robert R. Edwards, 2023-05-09 The Oxford History of Poetry in English is designed to offer a fresh multi-voiced and comprehensive analysis of poetry from Anglo-Saxon culture through contemporary British, Irish, American and Global culture including English, Scottish and Welsh poetry, Anglo-American, colonial and post-colonial poetry and poetry in Canada, Australia, New Zealand, the Caribbean, India, Africa, Asia and other international locales. The series both synthesizes existing scholarship and presents cutting-edge research employing a global team of expert contributors for each of the fourteen volumes. This volume occupies both a foundational and a revolutionary place. Its opening date 1100 marks the re-emergence of a vernacular poetic record in English after the political and cultural disruption of the Norman Conquest. By its end date 1400, English poetry had become an established if still evolving literary tradition. The period between these dates sees major innovations and developments in language, topics, poetic forms and means of expression. Middle English poetry reflects the influence of multiple contexts: history, social institutions, manuscript production, old and new models of versification, medieval poetic theory and the other literary languages of England. It thus emphasizes the aesthetic, imaginative treatment of new and received materials by medieval writers and the formal craft required for their verse. Individual chapters treat the representation of national history and mythology, contemporary issues and the shared doctrine and learning provided by sacred and secular sources including the Bible. Throughout the period, lyric and romance figure prominently as genres and poetic modes, while some works hover enticingly on the boundary of genre and discursive forms. The volume ends with chapters on the major writers of the late fourteenth century: Langland, the Gawain poet, Chaucer and Gower, and with a look forward to the reception of something like a national literary tradition in fifteenth-century literary culture
