Evgeny Morozov,2012-02-28 The revolution will be Twittered declared journalist Andrew Sullivan after protests erupted in Iran in June 2009 Yet for all the talk about the democratizing power of the Internet regimes in Iran and China are as stable

and repressive as ever In fact authoritarian governments are effectively using the Internet to suppress free speech hone their surveillance techniques disseminate cutting edge propaganda and pacify their populations with digital entertainment Could the recent Western obsession with promoting democracy by digital means backfire In this spirited book journalist and social commentator Evgeny Morozov shows that by falling for the supposedly democratizing nature of the Internet Western do gooders may have missed how it also entrenches dictators threatens dissidents and makes it harder not easier to promote democracy Buzzwords like 21st century statecraft sound good in PowerPoint presentations but the reality is that digital diplomacy requires just as much oversight and consideration as any other kind of diplomacy Marshaling compelling evidence Morozov shows why we must stop thinking of the Internet and social media as inherently liberating and why ambitious and seemingly noble initiatives like the promotion of Internet freedom might have disastrous implications for the future of democracy as a whole

Cyber-democracy and the Politics of Space Jonghwa Lee,2003 **A Private Sphere** Zizi Papacharissi,2010-08-02

Online technologies excite the public imagination with narratives of democratization The Internet is a political medium borne of democracy but is it democratizing This text examines how online digital media shape and are shaped by contemporary democracies *Democracy and New Media* Henry Jenkins,David Thorburn,Brad Seawell,2004 Essays on the promise and dangers of the Internet for democracy **Cyber Public Sphere and Social Movements** Sami Çöteli,2018 The diversification and politicisation of the mass media within itself and also societal pressure created by the mass media at a social level have caused changes to our social structure The first change began with the contextual changes to the mass media and this change led to visible changes in societies That transformation has almost erased the distinction between the private and the public spheres especially as social media has entered our lives Now things that occur in the private sphere are easily transported into the public sphere and others private spheres Therefore the virtual public sphere has emerged through social media and all other practices on the internet It appears that activist movements have either been founded in the cyberworld or that existing activist movements have been strengthened by finding supporters via social media and blogs The public sphere and activist movements that come into existence in the virtual environment such as social media are a new experience in terms of societies and they are the sign of how the future will be shaped It is obvious that social media is now an integral part of our daily lives It is a place where political and secular ideas spread In this social area each individual has the opportunity to make political statements as if they were standing in an agora Shared content represents the position within the virtual life that individuals have built for themselves This study defines the virtual public sphere together with virtual activism and the network society in the light of the public sphere private sphere debates **Electronic Democracy** Graeme Browning,1996 Turning computer owners into online activists by explaining how to be powerful players in the political process this book teaches how to organize e mail campaigns within congressional districts access a wealth of information that will impact politicians at the localm state and federal levels monitor law makers coting records and track campaign financing and contributions
