Systems Biology and Its Methodology Constantinos Mekios, 2007 Within the past decade Systems Biology SB has emerged as an ambitious new approach to the study of complex biological systems Despite its remarkable impact on biology and beyond however the approach remains largely undefined with respect to the fundamental question of its identity What is SB In this study a preliminary answer is sought in a consideration of SB's historical relationship to General System Theory a topography of its multidisciplinary character and an analysis of two cases from the scientific literature illustrating the application of its method in the laboratory The resulting characterization of SB permits the exploration of philosophical questions regarding its methodology Does it represent an alternative to reductionism What is the promise that it holds for the future of biology and what are the limits of its potential Finally what are its implications for the scientific status of biology the unity of science project and the philosophy of biology Given the scope of its analysis this book might interest both philosophically inclined biologists and philosophers of biology as well as more generally readers who think critically about the methodology of science

Tuning in to the neo-avant-garde Inge

Arteel, Lars Bernaerts, Siebe Bluijs, Pim Verhulst, 2021-07-06 Bringing together an international and diverse group of scholars *Tuning in to the neo avant garde* offers the first in depth study of the radio medium's significance as a site of artistic experimentation for the literary neo avant garde in the postwar period. Covering radio works from the 1950s until the 2010s the collection charts how artists across the UK Europe and North America continued as well as reacted to the legacies of the historical avant garde and modernism operating within different national broadcasting contexts by placing radio in an intermedial dialogue with prose poetry theatre music and film. In doing so the volume explores a wide variety of acoustic genres: radio play, feature, electroacoustic music, radiophonic poem, radio opera to show that the medium deserves to occupy a more central place than it currently does in studies of literature, intermedia, and the neo avant garde.
