Cytomegalovirus

Paul D. Griffiths

Royal Free and University College Medical School, London, UK

INTRODUCTION

Cytomegalovirus (CMV) infections were first described in the early years of the twentieth century when the typical owl's eye intranuclear inclusions were found by histopathologists in tissues from fetuses stillborn following cytomegalic inclusion disease. These strange inclusions were thought to result from a protozoan infection and, in 1910, one group of workers even proposed the name *Entamoeba mortinatalium* for the supposed agent. In the 1920s, the similarity of the inclusions to those produced by varicella were noted and the guinea-pig form of CMV was transmitted by salivary gland extracts passed through a Berkefeld N filter. Despite these two pieces of evidence suggesting a viral aetiology, reports were still occurring in the late 1940s attributing the disease to a strange protozoan infection. In 1956, three laboratories simultaneously isolated CMV, having successfully developed cell culture technology, so that the true nature of the infectious agent was apparent. One of these three investigators, Weller, gave the virus its name from the effects produced in cell culture, so CMV is named after its cytopathic effect.

THE VIRUS

Morphology

Electron micrographs of CMV reveal a typical herpesvirus appearance (Figure 2C.1). The central

DNA-containing core is surrounded by a capsid composed of 162 capsomeres, each of which is a hollow hexagon in cross-section. The capsid is in turn surrounded by a poorly demarcated area, the tegument, which is itself surrounded by a loosely applied envelope.

When CMV is propagated in cell cultures, two additional morphological forms are produced from the virus-specific proteins and envelope. The first is termed a 'dense body' and appears as a large amorphous structure without nucleocapsid or DNA. The second has been termed a 'non-infectious enveloped particle' and consists of an empty capsid surrounded by a lipid envelope.

Nucleic Acid

CMV contains 235 kb double-stranded DNA. The structure of the DNA is similar to that of herpes simplex virus (HSV) in that long and short unique sequences are bounded by terminally repetitive segments. Each long and short sequence can be orientated in one of two directions so that four DNA isomers are produced by cells in culture. The whole genome of strain AD169 has been sequenced (Chee *et al.*, 1990). The genes are numbered according to their relative positions on one of these four isomers, termed the prototype configuration. By international agreement, the proteins they encode are designated by *p* (for protein); *gp* (glycoprotein); or *pp* (phosphoprotein), followed by the gene number. This formal terminology may then be followed by a

Diaries Real and Fictional in Twentieth-Century French Writing Sam Ferguson, 2018-03-16 This volume is the first study of the diary in French writing across the twentieth century as a genre which includes both fictional and non-fictional works From the 1880s it became apparent to writers in France that their diaries a supposedly private form of writing would probably come to be published strongly affecting the way their readers viewed their other published works and their very persona as an author More than any other Andr Gide embraced the literary potential of the diary the first part of this book follows his experimentation with the diary in the fictional works *Les Cahiers d'Andr Walter* 1891 and *Paludes* 1895 in his diary of the composition of his great novel *Le Journal des faux monnayeurs* 1926 and in his monumental *Journal* 1889 1939 1939 The second part follows developments in diary writing after the Second World War inflected by radical changes in attitudes towards the writing subject Raymond Queneau's works published under the pseudonym of Sally Mara 1947 1962 used the diary playfully at a time when the writing subject was condemned by the literary avant garde Roland Barthes's experiments with the diary 1977 1979 took it to the extremes of its formal possibilities at the point of a return of the writing subject Annie Ernaux's published diaries 1993 2011 demonstrate the role of the diary in the modern field of life writing Throughout the century the diary has repeatedly been used to construct an oeuvre and author but also to call these fundamental literary concepts into question

Literary and Visual Representations of HIV/AIDS Aimee Pozorski, Jennifer J. Lavoie, Christine J. Cynn, 2019-11-06 *Literary and Visual Representations of HIV/AIDS Forty Years Later* depicts how film and literature about the HIV/AIDS crisis expand upon the issues generated by the epidemic This collection fills an important gap in the scholarship on HIV/AIDS by bringing together essays by both established and junior scholars on visual and literary

representations of HIV AIDS Almost forty years after the first reported cases of what would later be defined as AIDS this book looks back across the decades at works of literature and film to discuss how the representation of HIV AIDS has shifted in media This book argues that literature constitutes a very powerful response to AIDS that ripples into film and politics driving the changes in past and contemporary representations of HIV AIDS The book also expands discussion of the issues generated and amplified by the epidemic to consider how HIV AIDS has been portrayed in the United States Western and Southern Africa Western Europe and East Asia **Encyclopedia of Life Writing** Margaretta Jolly, 2013-12-04 First published in 2001 Routledge is an imprint of Taylor Francis an informa company **Surrealist Case Studies** Clara Elizabeth Urban, 2001 **Dalhousie French Studies** , 1998 **Gay & Lesbian Literature: Introduction to gay male literature** , 1994 **The Resilient Female Body** Women in French (Organization).
