Forms of Life Martin Price, 1983-01-01 The novel contains imagined lives that achieve a kind of meaning and intensity our own lives do not Out of the novelist's moral imagination the breadth and depth of his awareness of human motivations tensions and complexities emerge fictional persons through whom we learn to read ourselves This eloquent book exploring fictional lives in crucial moments of choice and change stresses both their difference from and their deep connections with life Martin Price writes here about ways in which character has been conceived and presented in the novels of the nineteenth and early twentieth centuries Beginning with chapters that cogently argue the artistic value of character Price then deals with the different forms character has taken in individual novels His first discussions center on authors Jane Austen Stendhal Charles Dickens George Eliot and Leo Tolstoy who define individuals by their adherence or opposition to social norms The next chapters deal with novelists for whom the moral world is largely internalized The characters of Henry James Joseph Conrad D H Lawrence and E M Forster live in society and act upon it but the authors are particularly concerned with the confusions terrors and heroism that lie within consciousness The last chapter uses novels about the artist by James Joyce Virginia Woolf and Thomas Mann in order to apprehend the process by which experience is transformed into art Avoiding both formalistic and moralistic extremes this new book by a distinguished critic helps us recover a fuller sense of literary form and the forms of life from which it emerges *Deleuze and Religion* Mary Bryden, 2001 This collection of essays explores the religious implications and connections of Deleuze's thinking It will prove invaluable for researchers teachers and students of Theology Philosophy Critical Theory and Cultural Studies **Encyclopedia of Contemporary Literary Theory** Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture *The Cambridge*
