Dada Leah Dickerman, Brigid Doherty, Centre Georges Pompidou, National Gallery of Art (U.S.), Museum of Modern Art (New York, N.Y.), 2005 Edited by Leah Dickerman Essays by Brigid Doherty Sabine T Kriebel Dorothea Dietrich Michael R Taylor Janine Mileaf and Matthew S Witkovsky Foreword by Earl A Powell III **Dada** National Gallery of Art, 2006 Dada, 2006 **Anarchism and the Advent of Paris Dada** Theresa Papanikolas, 2017-07-05 Anarchism and the Advent of Paris Dada sheds new light on Paris Dada's role in developing the anarchist and individualist philosophies that helped shape the cultural dialogue in France following the First World War Drawing on such surviving documentation as correspondence criticism periodicals pamphlets and manifestoes this book argues that contrary to received wisdom Dada was driven by a vision of social change through radical cultural upheaval The first book length study to interrogate the Paris Dadaists complex and often contested position in the postwar groundswell of anarcho individualism Anarchism and the Advent of Paris Dada offers an unprecedented analysis of Paris Dada literature and art in relation to anarchism and also revives a variety of little known anarcho individualist texts and periodicals In doing so it reveals the general ideological diversity of the postwar French avant garde and identifies its anarchist concerns in addition it challenges the accepted paradigm that postwar cultural politics were monolithically nationalist By positioning Paris Dada in its anarchist context this volume addresses a long ignored lacuna in Dada scholarship and more broadly takes its place alongside the numerous studies that over the past two decades have problematized the politics of modern art literature and culture The Grove Encyclopedia of American Art Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **Waste Matters** Nikole Bouchard, 2020-12-01 For thousands of years humans have experimented with various methods of waste disposal from burning and burying to simply packing up and moving in search of an unscathed environment Habits of disposal are deeply ingrained in our daily lives so casual and continual that we rarely ever stop to ponder the big picture effects on social spatial and ecological orders Rethinking the ways in which we produce collect discard and reuse our waste whether it's materials spaces or places is essential to ensure a more feasible future Waste Matters Adaptive Reuse for Productive Landscapes presents a series of historical and contemporary design ideas that reimagine a range of repurposed materials at diverse scales and in various contexts by exploring methods of hacking disassembly reassembly recycling adaptive reuse and preservation of the built environment Waste Matters will inspire designers to sample and rearrange bits of artifacts from the past and present to produce culturally relevant and ecologically sensitive materials objects architecture and environments An Introduction to the Making of Western Art Susan L. Green, 2024-03-29 This book is the first introduction to Western art that not only considers how choice of materials can impact form but also how objects in different media can alter in appearance over time and the role of conservators in the preservation of our cultural heritage The first four chapters cover wall and easel paintings sculpture drawings and prints

from the late Middle Ages to the present day They examine with numerous examples how these works have been produced how they might have been transformed and how efforts regarding their preservation can sometimes be misleading or result in controversy The final two chapters look at how photography new techniques and modern materials prompted innovative ways of creating art in the twentieth century and how the rapid expansion of technology in the twenty first century has led to a revolution in how artworks are constructed and seen generating specific challenges for collectors curators and conservators alike This book is primarily directed at undergraduates interested in art history museum studies and conservation but will also be of interest to a more general non specialist audience **Form and Meaning in Avant-Garde**

Collage and Montage Magda Dragu, 2020-02-06 This book uses intermedial theories to study collage and montage tracing the transformation of visual collage into photomontage in the early avant garde period Magda Dragu distinguishes between the concepts of collage and montage as defined across several media fine arts literature music film photography based on the type of artistic meaning they generate rather than the mechanical procedures involved The book applies theories of intermediality to collage and montage which is crucial for understanding collage as a form of cultural production Throughout the author considers the political implications as collages and montages were often used for propagandistic purposes This book combines research methods used in several areas of inquiry art history literary criticism analytical philosophy musicology and aesthetics Picturing Evolution and Extinction

Fae Brauer, 2015-10-05 With the increasing loss of biological diversity in this Sixth Age of Mass Extinction it is timely to show that devolutionary paranoia is not new but rather stretches back to the time of Charles Darwin It is also an opportune moment to show how human driven extinction as designated by the term Anthropocene has long been acknowledged The halcyon days of European industrial progress colonial expansion and scientific revolution trumpeted from the Great Exhibition of 1851 until the Dresden International Hygiene Exhibition of 1930 were constantly marred by fears of rampant degeneration depopulation national decline environmental devastation and racial extinction This is demonstrated by the discourses of catastrophism charted in this book that percolated across Europe in response to the theories of Darwin and Jean Baptiste Lamarck as well as Marcellin Berthelot Camille Flammarion Ernst Haeckel Louis Landouzy Felix Le Dantec Cesare Lombroso Thomas Huxley Bernard Augustin Morel Louis Pasteur Elis Reclus Rudolf Steiner and Wilhelm Wundt among others This book presents pioneering explorations of the interrelationship between these discourses and modern visual cultures and the ways in which the picturing of evolution and extinction by artists as diverse as Roger Broders Albert Besnard Fernand Cormon Hilne Dufau mile Gall Franti ek Kupka Pablo Picasso Carles Mani y Roig Sophie Taeuber and Vasilii Vatagin betrayed anxieties subliminally festering over degeneration alongside latent hopes of regeneration Following Darwin s concept of evolution as Janus faced the dialectical interplay of evolution and extinction and degeneration and regeneration is explored in modern visual cultures in Australia America Britain France Germany Russia Spain and Switzerland at significant spatio temporal junctures between 1860 and

1930 By unravelling the picturing of the dread of alcoholism cholera dysentery tuberculosis typhoid and rabies alongside phobias of animalism criminality hysteria impotency and ecological disaster each chapter makes an original contribution to this new field of scholarship By locating these discourses and visual cultures within the golden age of Neo Lamarckism they also reveal how regeneration was pictured as the Janus face of degeneration able to facilitate evolution through the inheritance of beneficial characteristics in propitious environments In striking such an uplifting note amidst the dissonant cacophony of catastrophism this book reveals why the art and science of Transformism proved so appealing in France as elsewhere and why visual cultures of regeneration became as dominant in the twentieth century as the picturing of degeneration had been in the nineteenth century It also illuminates the paradoxical inversion that occurred in the twentieth century when devolution became equivalent to evolution for many Modernists Hence whilst this book opens with the picturing of indigenous people in Australia and North America as doomed races by the first publication of Darwin's *On The Origin of Species* it closes with the quest by 1930 for a regenerative suntan as dark as the skin of those indigenous people
