**Dahomey and the Slave Trade** Polanyi Karl, 2022 The death of Karl Polanyi in 1964 at seventy seven curtailed a productive life in the fields economic history and economic anthropology Some of his students impressed with his erudition and disregard for the ordinary described him as otherworldly He was founder of the Galilei Society in Budapest the cradle of the liberal revolutions in Hungary in the first decades of the 20th century In the first World War he was a cavalry officer and after that war he went to Vienna There he became a columnist and commentator for the Oesterreichische Volkswirt in charge of analysis of international affairs For years he read daily The Times Le Temps the Frankfurter Zeitung all the Vienna papers and those from Budapest and others as they were relevant He emigrated to England where he became a tutor for Oxford University and the University of London and wrote re analysis of English economic history The Great Transformation After World War II Polanyi came to Columbia University to teach economic history His courses were always popular and well attended During his last years at Columbia and during his early years of retirement Polanyi was joined by Conrad Arensberg in heading a large interdisciplinary project for the comparative study of economic systems The volume that resulted was Trade and Market in the Early Empires a landmark in economic anthropology and economic history Polanyi s interest in Dahomey stems from one of his students who had contributed two papers on Dahomey to Trade and Market Polanyi grew interested and with characteristic thoroughness read the literature on that West African kingdom The present book resulted from these last years of productive scholarship Dahomey and the Slave Trade was prepared for the press by his widow Ilona Duczynska Polanyi Foreword vii This book is of vital importance to anthropology for several reasons the most compelling being that the concerns of history and of anthropology are overlapped

in it Besides making available the economic history of one of the great West African kingdoms it sets forth some new theory for economic anthropology particularly Part III in which Polanyi makes sense of the intricacies of trade between a people with a fully monetized economy and one without and those passages in which he adds house holding as a concept to his ideas about the principles of economic integration Polanyi s position in economic anthropology not to mention the status he achieved as economic historian translator of Hungarian literature man of action and inspiring teacher is secure He has enabled anthropologists to focus their studies of economy on processes of allocation rather than on processes of production thereby bringing the studies into line with economic theory without merely applying economic theory to systems it was not designed to explain The release that resulted from this great stride forward can be compared for economic anthropology and studies in comparative economics with the importance of the discovery in the late nineteenth century of the price mechanism itself The more we know about the workings of other and strange economies the more we can know of our own Polanyi s work will stand as a major source of comparative insight the core of anthropological purpose     The Atlantic Slave Trade: Seventeenth century Jeremy Black,2006 Dealing with reasons for the end of the slave trade and of slavery this volume emphasizes abolitionism and discusses the persistence of the trade particularly to Brazil and Cuba     Dahomey and the Dahomans Frederick E. Forbes,1851     **Dahomey and the Slave Trade. An Analysis of an Archaic Economy. [By] Karl Polanyi, in Collaboration with Abraham Rotstein, Etc. [With Maps].** Károly POLÁNYI,Abraham Rotstein,1966
